U.S. DEPARTMENT OF LABOR
William E. Brock, *Secretary*

BUREAU OF LABOR STATISTICS
Janet L. Norwood, *Commissioner*

OFFICE OF PRICES AND LIVING CONDITIONS
Kenneth V. Dalton, *Associate Commissioner*

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year $25 domestic, and $31.25 foreign. Single copy domestic, $4; foreign, $5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

May	June 20	August	September 23
June	July 23	September	October 23
July	August 21	October	November 25

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements
April 1986

The Consumer Price Index for All Urban Consumers (CPI-U) declined 0.2 percent before seasonal adjustment in April to a level of 325.3 (1967 = 100). For the 12-month period ended in April, the CPI-U has increased 1.6 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) declined 0.3 percent in April prior to seasonal adjustment. The April 1986 CPI-W level of 320.4 (1967 = 100) was 1.2 percent higher than the index in April 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U declined 0.3 percent in April, following decreases of 0.4 percent in each of the preceding 2 months. During this 3-month period, prices have declined at a 4.3 percent seasonally adjusted annual rate, the largest such decrease since the 3-month period ended in January 1949. Energy prices continued to decline in April—down 5.8 percent. The CPI excluding energy advanced 0.4 percent, about the same as the average monthly increase in the preceding 12-month period.

During the first 4 months of 1986, the CPI-U declined at an annual rate of 2.3 percent. This compares with a 3.8-percent increase in all of 1985.

The transportation index, again reflecting a drop in prices for motor fuels and used cars, declined 2.5 percent in April, its third consecutive monthly decrease. Gasoline prices—down 11.3 percent in April—have dropped 26.5 percent in the past 3 months. These decreases have brought the gasoline index back to the mid-1979 level and to a point 34.9 percent below the peak level of March 1981. Used car prices declined for the third consecutive month—down 0.8 percent in April—and were 5.6 percent below their level a year ago. A drop in automobile finance charges—down 1.8 percent—also contributed to the decrease in transportation costs. The indexes for new cars, automobile insurance costs, and public transportation increased in April. New car prices advanced 0.6 percent in April, partially reflecting the higher prices of imports. Automobile insurance costs increased 0.8 percent in April to reach a level 13.5 percent higher than in April 1985. The index for public transportation increased 0.2 percent, after registering a 0.2-percent decline in March.

The housing index increased 0.3 percent in April, following a 0.2-percent rise in March. A 0.9-percent rise in the cost of shelter more than offset declines in the other two major housing groups—fuel and utilities and household furnishings and operations. Within shelter, renters' costs rose 1.1 percent, homeowners' costs increased 0.8 percent, and maintenance and repair costs were, on average, unchanged. The index for fuel and utilities declined for the third consecutive month. Fuel oil prices, which declined 4.6 percent in April, have fallen 22.1 percent in the first 4 months of 1986 and are 30.3 percent below their peak level of April 1981. Charges for electricity and natural gas—down 0.9 and

Entertainment	.4	.4	.0	1.0	.2	0	.1	.8	3.2
Other goods and services	.5	.3	.6	1.0	.5	.4	.4	5.0	6.1

0.4 percent, respectively—declined for the second consecutive month. Partially offsetting these decreases was a 1.8-percent rise in local telephone service charges. The 0.4-percent drop in the index for household furnishings and operation was largely due to declines in the indexes for furniture and bedding and textile housefurnishings.

The food and beverage component rose 0.3 percent in April. Grocery store food prices—up 0.2 percent—registered their first increase since January. This advance was primarily a result of a 7.0-percent increase in prices for fresh fruits and vegetables. In particular, lettuce prices rose 26.7 percent in April. Partially offsetting the increase in fresh fruits and vegetables was a decline in the index for meats, poultry, fish, and eggs. Beef prices—down 2.9 percent in April—declined for the fourth consecutive month. Pork prices increased 0.6 percent, following seasonal adjustment, but were still below their level at the end of 1985. Prices for other meats, poultry, and eggs all declined in April and were lower than at the end of last year. Each of the other major grocery store food groups reflected very little price movement in April. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—increased 0.4 and 0.2 percent, respectively.

The April increase of 0.6 percent in the medical care component follows a 1.0-percent rise in March. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.4 percent. The index for medical care services increased 0.7 percent, with the costs of professional services and hospital rooms up 0.6 and 0.5 percent, respectively.

After registering declines in each of the first 3 months of 1986, the index for apparel and upkeep advanced 0.3 percent in April. The indexes for both clothing and apparel services also increased 0.3 percent in April.

The entertainment component increased 0.1 percent in April, following a slight decline in March. A 0.5-percent increase in the index for entertainment services more than offset a 1.2-percent decline in prices for sporting goods and equipment. The index for other goods and services increased 0.4 percent in April, the same as in March.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers declined 0.4 percent in April.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Other alcoholic beverages [1 3]	12/77	139.4	139.4	2.3	47.9	1.7	1.4	23.0	1.6
Whiskey [1 3]		169.7	170.1	.8	47.8	-1.2	-.7	22.0	-.9
Alcoholic beverages away from home	12/77	173.1	172.9	4.5	13.1	7.8	3.1	8.7	5.4
Special indexes:									
Domestically produced farm food		281.6	281.4	.7	1.7	6.2	-8.0	1.2	-1.1
Selected beef cuts [1]		270.5	265.3	-12.9	-2.3	20.6	-13.5	-7.7	2.1
Imported food and fishery products [4]	12/77	152.8	153.3	.3	4.3	8.0	16.1	2.2	11.9

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [5]	2	12/77	-	174.8	-	172.6	1.1	-1.3	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 14. Consumer Price Index for All Urban Consumers: Selected areas, food at home expenditure categories

(1967 = 100, unless otherwise noted)

Area, region, and population size class	Other index base	Total food at home	Cereals and bakery products	Meats, poultry, fish, and eggs [1]	Dairy products	Fruits and vegetables	Other foods at home [1]

South/D	-.2	-.4	-.3	.7	2.0	-1.6
West/D [4]	-.2	.3	-2.2	.4	2.7	-.6

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1982=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Indexes on a January 1976=100 base.

[9] Indexes on an August 1981=100 base.

[10] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[11] After December 1986, this area will be published on a monthly basis.

[12] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

West/D [9]	2	12/77	-	176.3	-	173.9	.9	-1.4	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.
After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1984=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Indexes on a January 1976=100 base.

[9] Indexes on an August 1981=100 base.

[10] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[11] After December 1986, this area will be published on a monthly basis.

[12] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1982=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982 = 100 base.

[4] Indexes on a June 1978 = 100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982 = 100 base.

[4] Indexes on a June 1978 = 100 base.

[5] Indexes on an August 1981 = 100 base.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1984 = 100 base.
[3] Indexes on a June 1978 = 100 base.
[4] Indexes on an August 1981 = 100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Indexes on an August 1981=100 base.

[NA] Data not adequate for publication.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Due to smaller sizes in this area, data will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

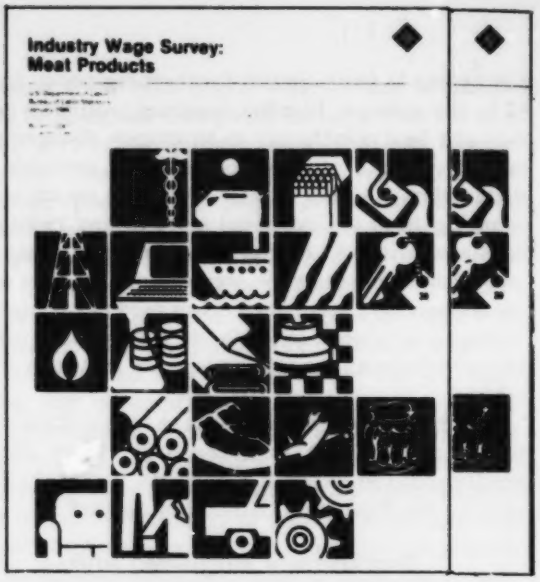
from the
Bureau of Labor Statistics

Wage Surveys
for the following industries:

- **Meat Products**
- **Millwork**
- **Certificated Air Carriers**



Surveys include:

- Results from the latest BLS survey of wages and supplemental benefits.
- Detailed occupational data for the Nation, regions, and selected areas (where available).
- Data useful for wage and salary administration, union contract negotiation, arbitration, and Government policy considerations.

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year $25 domestic, and $31.25 foreign. Single copy domestic, $4; foreign, $5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements
May 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.3 percent before seasonal adjustment in May to a level of 326.3 (1967 = 100). For the 12-month period ended in May, the CPI-U has increased 1.6 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 0.3 percent in May prior to seasonal adjustment. The May 1986 CPI-W level of 321.4 (1967 = 100) was 1.1 percent higher than the index in May 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U increased 0.2 percent in May, following declines in each of the preceding 3 months. Gasoline prices, which had dropped 26.5 percent in the 3-month period ended in April, advanced 2.5 percent in May and were responsible for the turnaround in the overall CPI-U. On the other hand, household energy costs continued to decline as all 3 components—fuel oil, electricity, and natural gas—registered decreases. Excluding energy, the CPI-U rose 0.2 percent in May, compared with a 0.4-percent increase in April and an average monthly increase of 0.3 percent over the last 12 months.

During the first 5 months of 1986, the CPI-U declined at an annual rate of 1.4 percent. This compares with a 3.8-percent increase for all of 1985.

The transportation index, reflecting the upward movement in gasoline prices, rose 0.3 percent in May, following sharp declines in each of the 3 preceding months. Despite the advance in May, gasoline prices remained at their mid-1979 level and were 33.3 percent below their peak level of March 1981. The new car index rose 0.8 percent in May, as a result of price increases in both domestic and imported models. The index for public transportation rose 0.4 percent, after registering a 0.2-percent increase in April. Used car prices and automobile finance charges continued to decline in May—down 1.9 and 2.6 percent, respectively. Automobile insurance costs, which had increased 13.5 percent in the preceding 12-month period, slowed in May, advancing 0.4 percent.

The housing component declined 0.1 percent in May, following an increase of 0.3 percent in April. Shelter costs, which increased 0.9 percent in April, rose 0.1 percent in May. These increases compare with an average monthly rise of 0.5 percent for the 12 months ended in May. Within shelter, renters' and homeowners' costs rose 0.1 and 0.2 percent, respectively, while maintenance and repair costs declined 0.1 percent. The index for fuel and other utilities declined for the fourth consecutive month. Fuel oil prices, which dropped 5.1 percent in May, have fallen 26 percent in the first 5 months of 1986 to a level 33.8 percent below their peak level of April 1981. Charges for electricity and natural gas—down 0.9 and 0.1 percent, respectively—declined for the third consecutive month. Partially offsetting the decline in fuels and the moderation in shelter costs was a turnaround in the index for household furnishings and operations, which rose 0.3

Table A. Percent changes in the CPI for All Urban Consumers (CPI-U)

Expenditure category	Seasonally adjusted								Unadjusted
	Changes from preceding month							Compound annual rate 3 months ended May 1986	12 months ended May 1986
	1985		1986

Other goods and services	.3	.6	1.0	.5	.4	.4	.2	3.9	6.0

percent in May largely due to a substantial increase in prices for furniture and bedding.

The food and beverage component advanced 0.4 percent in May. Grocery store food prices also rose 0.4 percent, following an increase of 0.2 percent in April. Fresh fruit and vegetable prices, which rose 3.4 percent in May compared to 7.0 percent in April accounted for a large part of the advance. A turnaround in the May indexes for cereal and bakery products—up 0.4 percent—and meats, poultry, fish, and eggs—up 0.3 percent—were principally responsible for the moderate acceleration in grocery store food prices. Beef prices continued to decline and pork prices were unchanged in May but prices for other meats, poultry, and fish and seafood all registered substantial increases. Charges for restaurant meals rose 0.5 percent, while prices for alcoholic beverages were unchanged in May.

The medical care component increased 0.6 percent in May, the same as in April. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.3 percent. The index for medical care services increased 0.7 percent, with the costs of physicians' services and hospital rooms up 0.6 and 0.4 percent, respectively.

After registering its first increase of the year in April, the index for apparel and upkeep declined 0.2 percent in May. Decreases in the indexes for women's clothing, boys' clothing, and footwear more than offset small increases in prices for men's and girls' apparel. The index for apparel services rose 0.2 percent.

The entertainment and the other goods and services components both increased 0.4 percent in May, following increases in April of 0.1 and 0.4 percent, respectively.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.2 percent in May.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

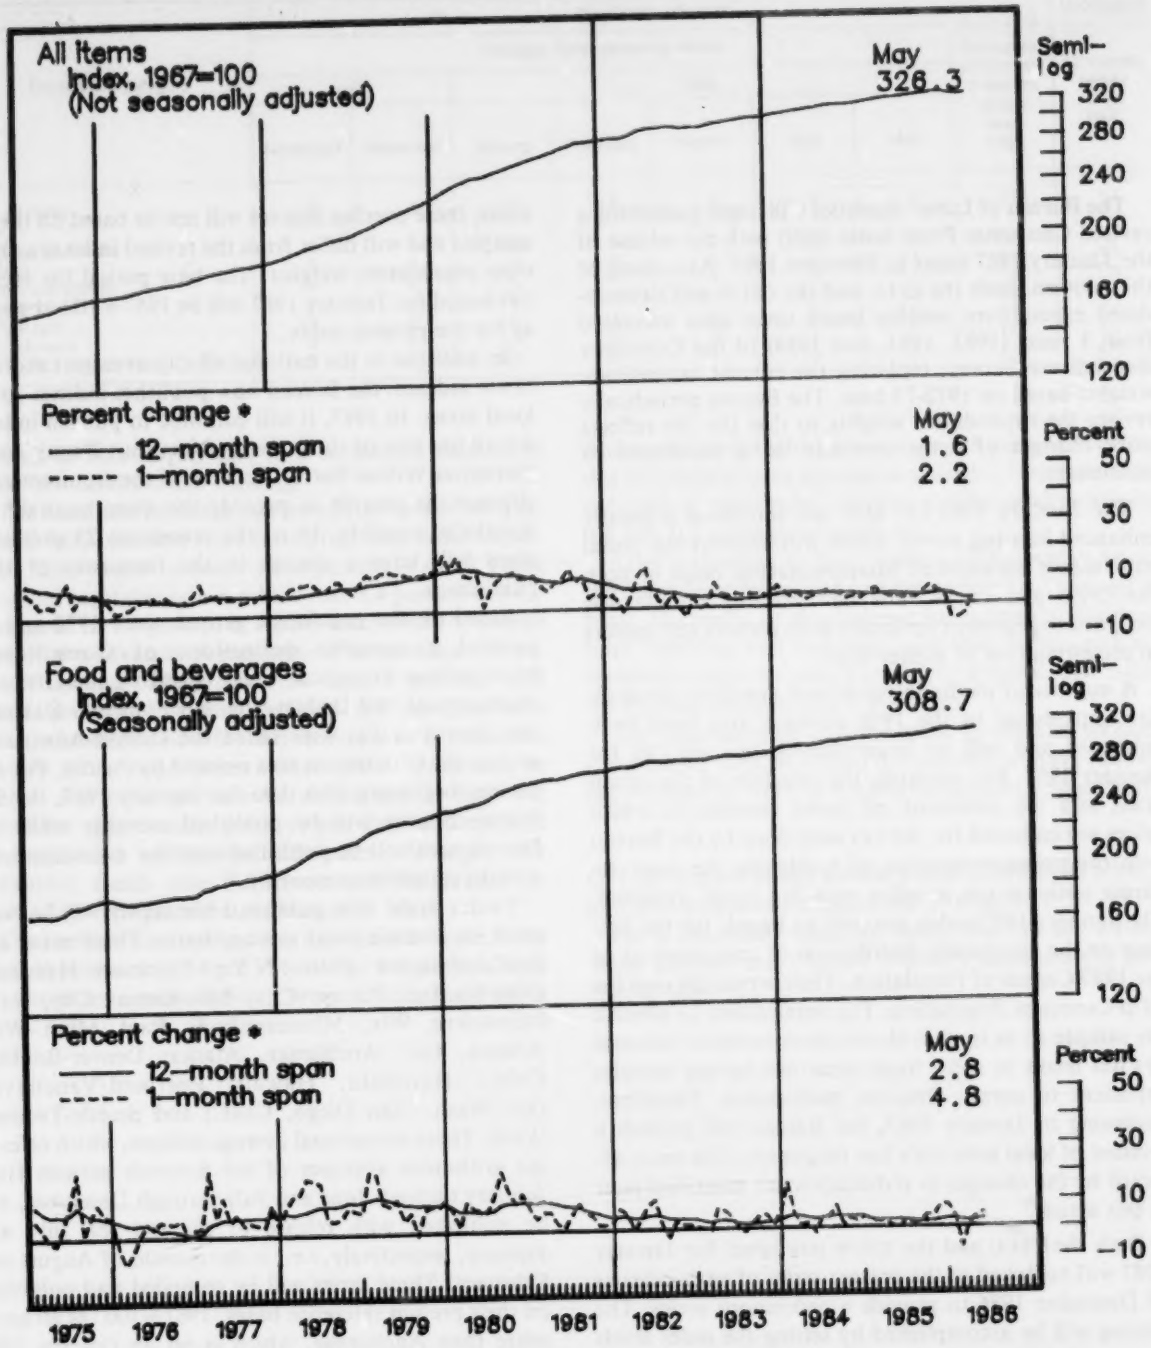
In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

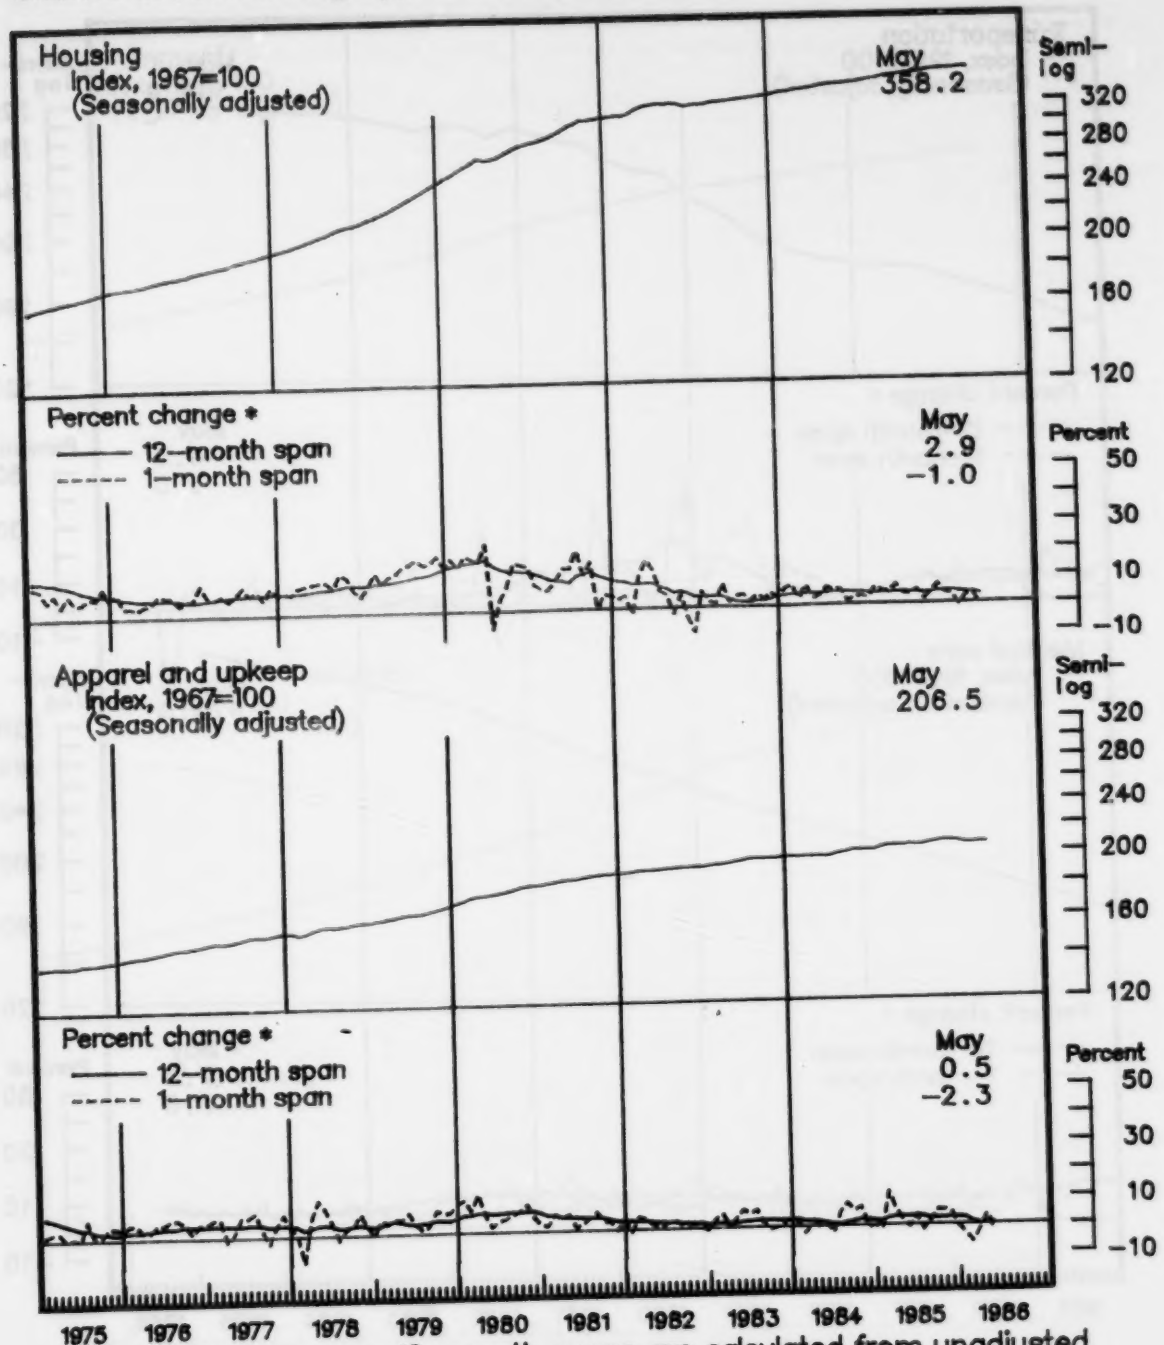
Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

Chart 1: CPI-U: All items, food and beverages, 1975-86



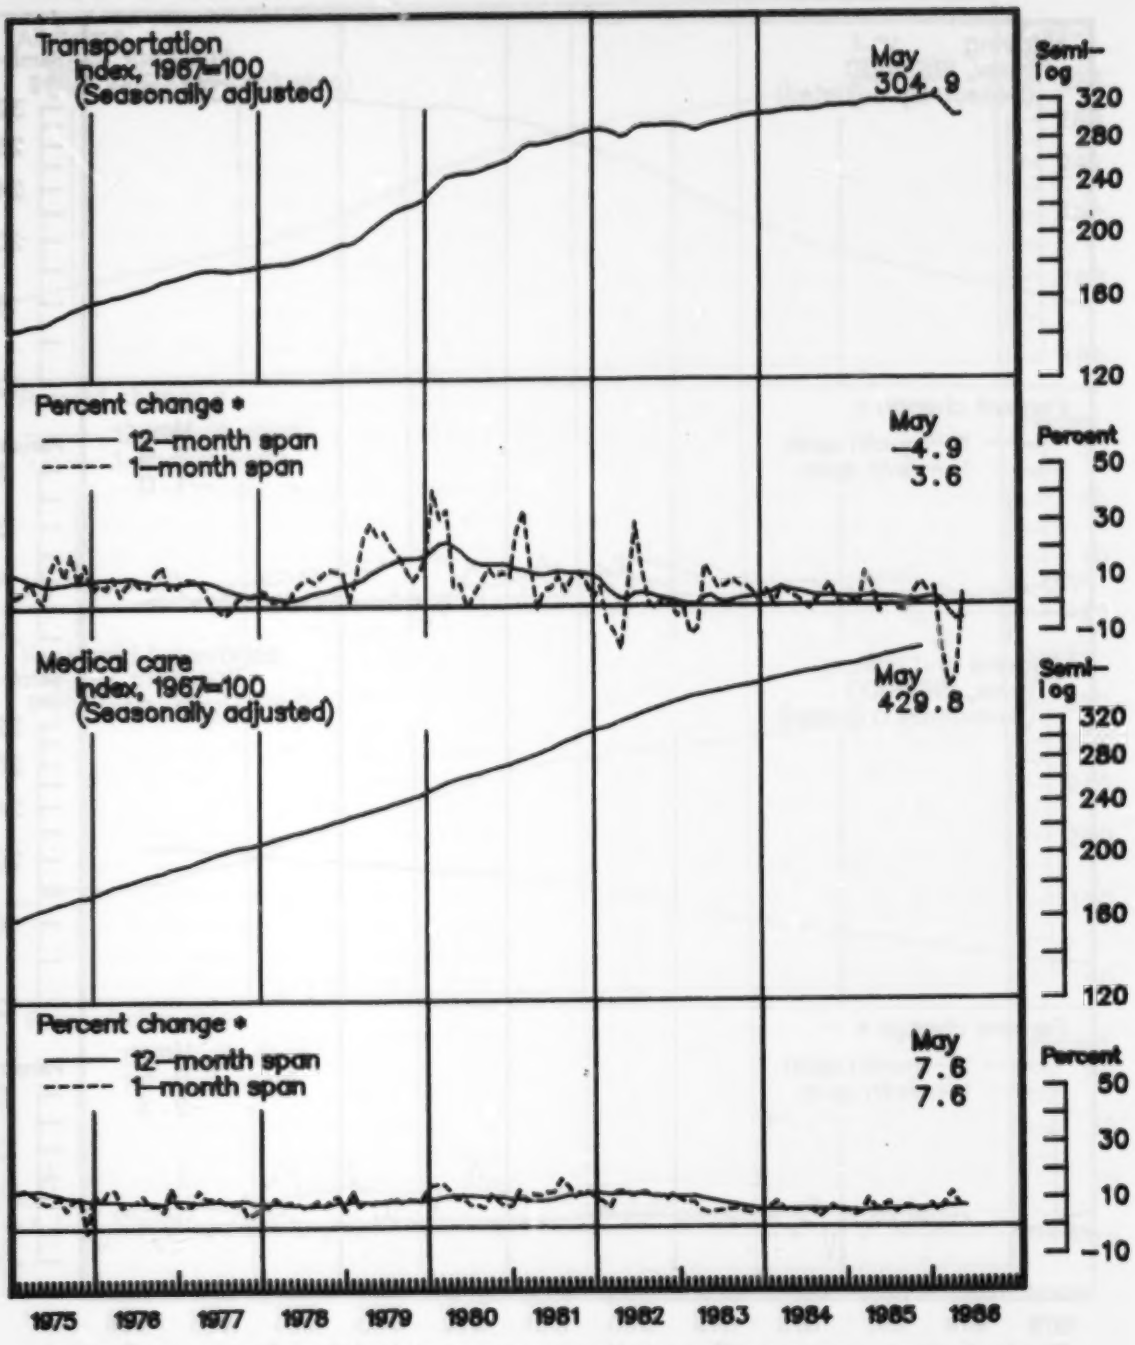
* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 2: CPI-U: Housing, apparel and upkeep, 1975-86



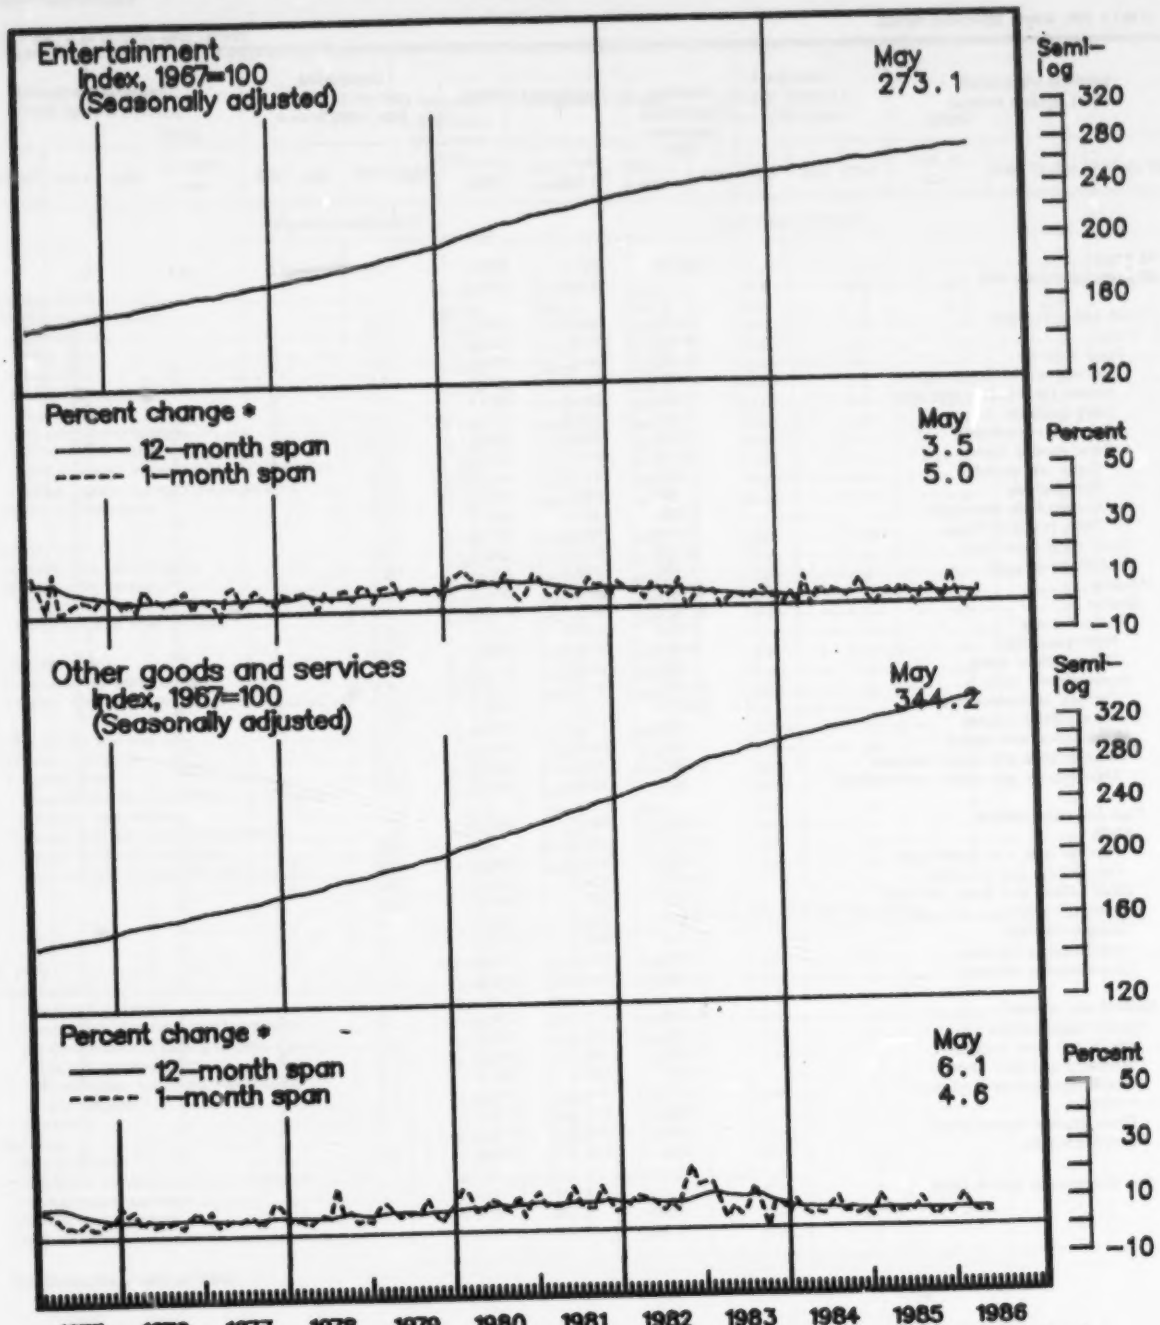
* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 3: CPI-U: Transportation and medical care, 1975-86



* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 4: CPI-U: Entertainment, other goods and services, 1975-86



* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Table 1. Consumer Price Index for All Urban Consumers: U.S. city average, by expenditure category and commodity and service group

(1967 = 100, unless otherwise noted)

Group	Relative importance, December 1985	Unadjusted indexes		Unadjusted percent change to May 1986 from—		Seasonally adjusted percent change from—		
		Apr. 1986	May 1986	May 1985	Apr. 1986	Feb. to Mar.	Mar. to Apr.	Apr. to May
	Expenditure category							
All items	100.000	325.3	326.3	1.6	0.3	-0.4	-0.3	0.2
All items(1957-59 = 100)	-	378.3	379.5	-	-	-	-	-

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Housekeeping and home maintenance services [1]		390.0	390.5	3.9	2.2	2.6	.5	3.1	1.6

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.
[2] This index series will not be published after December 1986.
[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.
[4] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.
NOTE: Index applies to a month as a whole, not to any specific date.

West/D [5]	2	12/77	174.8	-	172.6	-	-	-	-	1.1	-1.3	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 14. Consumer Price Index for All Urban Consumers: Selected areas, food at home expenditure categories

(1967 = 100, unless otherwise noted)

Area, region, and population size class	Other index base	Total food at home	Cereals and bakery products	Meats, poultry, fish, and eggs [1]	Dairy products	Fruits and vegetables	Other foods at home [1]

South/D	-.3	.2	-2.1	.1	3.4	-.5
West/D [4]	.9	.3	.7	-.1	3.4	.5

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

Services less medical care	335.6	1.4	358.0	.8	368.0	.0	507.2	1.4	394.4	-.5	379.3	.4

[1] Areas on pricing schedule 2 (See footnote 1 table 13) will appear next month.

[2] Indexes on a October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes are on a November 1977=100 base unless otherwise indicated.

[5] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[6] Indexes on a November 1982=100 base.

[7] Index on a June 1978=100 base in Miami, Fla.

[8] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[9] Indexes on a June 1978=100 base.

[10] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[11] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[12] Indexes on an August 1981=100 base.

[13] Indexes are on the bases listed below:

Anchorage, Alaska.....January 1978=100
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania...November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif.....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[14] Data for Northeast, Pa. will no longer be published after December 1986.

[15] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[16] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[17] Index on a June 1978=100 base in San Diego, Calif.

[18] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[19] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base' in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

West/D [5]	2	12/77	176.3	-	173.9	-	-	-	-	.9	-1.4	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 19. Consumer Price Index for Urban Wage Earners and Clerical Workers : Selected areas, food at home expenditure categories

(1967 = 100, unless otherwise noted)

Area, region, population size class	Other index base	Total food at home	Cereals and bakery products	Meats, poultry, fish, and eggs [1]	Dairy products	Fruits and vegetables	Other foods at home [1]

West/D [4]	.9	.6	.6	-.1	2.9	.4

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 2 (See footnote 1 table 18) will appear next month.

[2] Indexes on an October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes on a November 1977=100 base unless otherwise indicated.

[5] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[6] Indexes on a November 1984=100 base.

[7] Index on a June 1978=100 base in Miami, Fla.

[8] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[9] Indexes on a June 1978=100 base.

[10] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[11] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[12] Indexes on an August 1981=100 base.

[13] Indexes are on the bases listed :

Anchorage, Alaska.....January 1978=100.
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November 1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania...November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif.....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[14] Data for Northeast, Pa. will no longer be published after December 1986.

[15] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[16] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[17] Index on a June 1978=100 base in San Diego, Calif.

[18] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[19] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

[6] The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for May 1986		Average price per KWH of electricity		Range of KWH consumption for May 1986

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Table P-3. Average prices for gasoline, U.S. city average and selected areas (Per gallon)

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

BLS projections of employment

Revised projections of employment, output, and demand for 1995 by industry and occupation are presented in this collection of four articles from the ***Monthly Labor Review.*** Additional data and a detailed methodology also are provided.

Subjects include:

- The labor force—expected changes in size and composition.
- Gross national product—alternative trends and major assumptions.
- Distribution of demand—changing patterns in the major sectors of consumption, business investment, government expenditures, and foreign trade.
- Industry output and employment.
- Changing occupational employment requirements.

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year $25 domestic, and $31.25 foreign. Single copy domestic, $4; foreign, $5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

July	August 21	October	November 25
August	September 23	November	December 19
September	October 23	December	January 21

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements
June 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.5 percent before seasonal adjustment in June to a level of 327.9 (1967 = 100). For the 12-month period ended in June, the CPI-U has increased 1.7 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 0.5 percent in June prior to seasonal adjustment. The June 1986 CPI-W level of 323.0 (1967 = 100) was 1.3 percent higher than the index in June 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0. 5 percent in June. This compares with a 0.2-percent increase in May and declines in each of the 3 preceding months. Excluding energy, the CPI-U rose 0. 2 percent in June, the same as in May. Energy prices, which were responsible for the earlier declines, rose 2.3 percent in June, following a slight advance in May, and accounted for about half of the June advance in the overall CPI-U. Substantial increases in prices for gasoline, electricity, and natural gas were only partially offset by a further decline in fuel oil prices.

During the first 6 months of 1986, the CPI-U declined at a seasonally adjusted annual rate of 0.2 percent. This decrease represents the first time that the index has declined over the first half of the year since 1955. Reflecting the sharp drop in crude oil prices, the index for energy commodities—fuel oil, coal, bottled gas, and motor fuels—declined at an annual rate of 40.2 percent in the first half of 1986. Prices for used cars and grocery store foods also declined in the first half. On the other hand, shelter costs continued to advance at an annual rate of about 5 percent. The index for all items excluding food, shelter, energy, and used cars increased at an annual rate of 4 percent during the first 6 months. Within this all other items group, however, price movements for commodities and for services continued to diverge. Price increases in the goods sector, continued to moderate, but prices for services, in particular medical care, have accelerated.

The annual rates for these groups during the last several years and the first half of 1986 are shown below.

	Annual percent changes				*Seasonally adjusted annual rate—*
	12 months ended December				*6-months ended June 1986*
	1982	*1983*	*1984*	*1985*

Other goods and services	.6	1.0	.5	.4	.4	.2	.3	3.7	5.9

In June, the transportation component registered its second consecutive monthly increase, after declining sharply in the 3 preceding months. The motor fuel component, which had been primarily responsible for the sharp declines earlier this year, rose 3.0 percent in June and accounted for nearly three-fourths of the 0.8-percent advance in the June transportation index. Despite increases in May and June, gasoline prices have declined 22.3 percent in the first 6 months of 1986 and are 31.2 percent below their peak level of March 1981. The new car index rose 0.6 percent in June, reflecting price increases in both domestic and imported models. This index has advanced at an 8.4-percent annual rate in the past 3 months, the largest quarterly increase in 5 years. In contrast automobile finance charges declined 0.9 percent in June and fell at an annual rate of 19.2 percent during the second quarter. Automobile insurance costs increased 1.3 percent in June and have risen 14 percent in the past 12 months. Used car prices declined 0.4 percent in June and were 4.7 percent lower than in June 1985. The index for public transportation rose 0.4 percent in June, the same as in May.

The housing component, which declined 0.1 percent in May, rose 0.5 percent in June, reflecting a sharp turnaround in the index for fuel and other utilities. The indexes for electricity and natural gas rose 3.7 and 1.2 percent, respectively, in June, following declines in each of the 3 preceding months. Charges for telephone services, which were unchanged in May, increased 1.9 percent in June. A 4.6-percent rise in local charges, reflecting an increase in the monthly line access fee, more than offset decreases of 5.6 and 0.2 percent in interstate and intrastate toll calls, respectively. (Local telephone charges are priced monthly in all areas; long distance charges are priced every other month in most areas.) Fuel oil prices, however, continued to decline—down 2.1 percent in June and 27.6 percent in the first 6 months of 1986. Shelter costs increased 0.2 percent in June, following a 0.1-percent increase in May. Within shelter, renters' costs rose 0.4 percent, homeowners' costs were virtually unchanged, and maintenance and repair costs declined 0.1 percent. The index for household furnishings and operations rose 0.2 percent in June.

The food and beverage index rose 0.1 percent in June, after advancing 0.4 percent in May. Grocery store food prices, which had also increased 0.4 percent in May, declined slightly in June. A turnaround in fruit and vegetable prices more than offset the acceleration in most other major grocery store food groups. Fresh fruit and vegetable prices declined 4.3 percent in June after increasing 10.6 percent in the previous 2-month period. The cereal and bakery products and meats, poultry, fish, and egg groups, however, registered their largest increases this year—up 0.7 and 1.0 percent, respectively. Pork, poultry, and egg prices all rose substantially in June and beef prices—up 0.3 percent—registered their first increase in 1986. The indexes for dairy products and other foods at home increased only slightly in June. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.4 and 0.3 percent, respectively.

The medical care component increased 0.7 percent in June, about the same as the average monthly rate of increase during the first 5 months of 1986. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.5 percent. The index for medical care services increased 0.7 percent, with the costs of physicians' services and hospital rooms up 0.5 and 0.8 percent, respectively.

The index for apparel and upkeep declined 0.3 percent in June. For the first 6 months of 1986, apparel prices have declined at an annual rate of 2.4 percent. Prices for men's, boys', women's, and girls' clothing and for footwear each declined during the first 6 months while the index for apparel services increased at an annual rate of 4.1 percent.

In June, for the second consecutive month, the entertainment and the other goods and services components both registered increases of 0.4 percent.

CPI for Urban Wage Earners and Clerical Workers (CPI-W) — seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.5 percent in June.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee; Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 4. Consumer Price Index for All Urban Consumers: Food expenditure categories, seasonally adjusted, U.S. city average —Continued

(1967=100, unless otherwise noted)

Group and item	Other index base	Seasonally adjusted indexes		Seasonally adjusted annual rate percent change for—					
				3 months ending in—				6 months ending in—	
		May 1986	June 1986	Sept. 1985	Dec. 1985	Mar. 1986	June 1986	Dec. 1985	June 1986
Food away from home		358.4	359.8	4.0	3.0	2.7	5.4	3.5	4.1
Lunch	12/77	172.9	173.5	4.4	3.6	2.8	4.7	4.0	3.8
Dinner	12/77	172.6	173.2	3.4	3.6	2.4	3.8	3.5	3.1
Other meals and snacks	12/77	177.1	178.4	3.8	2.3	3.0	6.7	3.1	5.9
Alcoholic beverages		238.9	239.6	3.2	14.9	1.7	2.2	8.9	1.9
Alcoholic beverages at home	12/77	151.9	151.9	1.9	15.7	.8	1.3	8.6	1.1
Beer and ale		239.8	239.8	3.1	3.2	-.2	1.5	3.2	.7
Wine [1]		240.4	241.7	1.9	-2.3	11.2	.8	-.3	5.9
Distilled spirits [1 2]	12/77	141.9	141.9	2.2	40.1	1.7	1.1	19.7	1.4
Other alcoholic beverages [1 3]	12/77	139.2	139.7	3.2	40.0	5.3	.9	20.2	3.1
Whiskey [1 3]		170.4	170.1	1.8	39.7	.2	.9	19.3	.6
Alcoholic beverages away from home	12/77	173.5	175.5	6.8	14.0	4.8	5.7	10.3	5.2
Special indexes:									
Domestically produced farm food		284.2	284.3	1.0	7.3	-7.6	3.9	4.1	-2.0
Selected beef cuts [1]		264.1	264.1	-9.0	28.2	-9.6	-9.1	8.0	-9.4
Imported food and fishery products [4]	12/77	153.3	152.2	3.7	2.2	21.3	-1.6	2.9	9.3

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [6]	2	12/77	–	172.6	–	174.1	.9	.9	–	–	–	–

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

South/D	.2	.5	1.6	.3	-2.6	.0
West/D [4]	-1.3	.0	-.1	-.5	-6.5	-.2

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1982=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Indexes on a January 1976=100 base.

[9] Indexes on an August 1981=100 base.

[10] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[11] After December 1986, this area will be published on a monthly basis.

[12] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D [4]	-1.0	.2	.0	-.5	-5.5	-.2

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1984=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Indexes on a January 1976=100 base.

[9] Indexes on an August 1981=100 base.

[10] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis.....April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[11] After December 1986, this area will be published on a monthly basis.

[12] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1982=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[5] Indexes on an August 1981=100 base.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1984 = 100 base.
[3] Indexes on a June 1978 = 100 base.
[4] Indexes on an August 1981 = 100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Indexes on an August 1981=100 base.

[NA] Data not adequate for publication.

Table P-1. Average residential prices for utility (piped) gas, electricity, and fuel oil, U.S. city average and selected areas

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for June 1986		Average price per KWH of electricity		Range of KWH consumption for June 1986

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

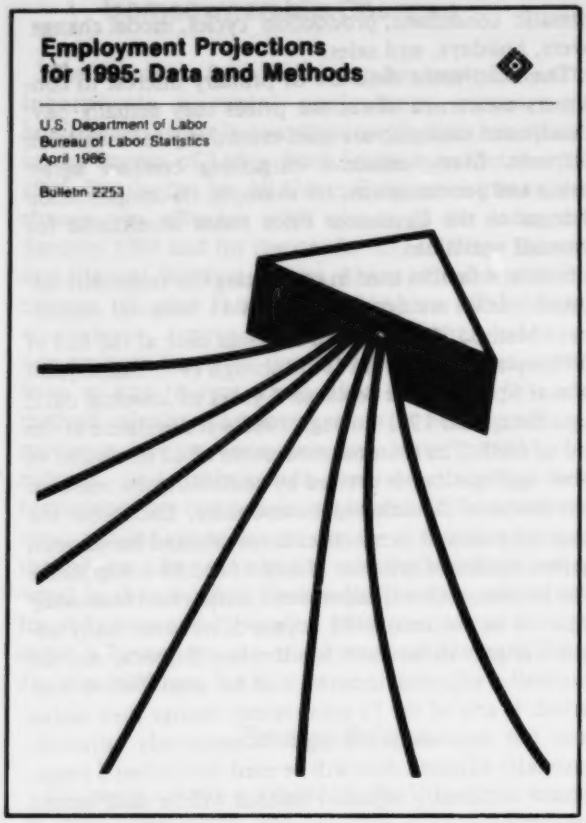
Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model change overs, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.



BLS projections of employment

Revised projections of employment, output, and demand for 1995 by industry and occupation are presented in this collection of four articles from the ***Monthly Labor Review.*** Additional data and a detailed methodology also are provided.

Subjects include:

- The labor force—expected changes in size and composition.
- Gross national product—alternative trends and major assumptions.
- Distribution of demand—changing patterns in the major sectors of consumption, business investment, government expenditures, and foreign trade.
- Industry output and employment.
- Changing occupational employment requirements.

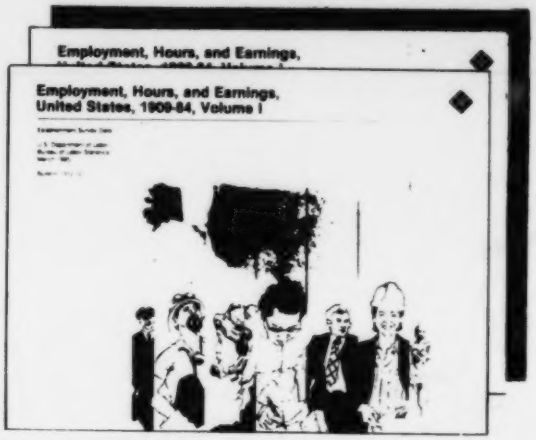
Employment, Hours, and Earnings, United States, 1909-84



Bureau of Labor Statistics, Bulletin 1312-12

A two-volume Comprehensive Reference Work for Historical Data

Features:

Employment:

- 1,500 monthly series for all employees, women, and nonsupervisory workers
- 600 industries at various levels of aggregation
- Employment by industry division from 1919

Hours and earnings:

- 1,300 monthly series on average weekly and hourly earnings and average weekly hours for production workers
- Covers over 450 industries

Seasonally adjusted data:

- Over 190 seasonally adjusted series

Uses:

- Economic indicators
- Economic research and planning
- Industry studies
- Marketing studies
- Wage negotiations
- In escalation clauses of procurement and labor contracts

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year $25 domestic, and $31.25 foreign. Single copy domestic, $4; foreign, $5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

September	October 23	December	January 21
October	November 25		

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. Semiannual average tables (S-1—S-10) introduced in this issue represent one aspect of the revision. See page 3 for further details.

Price Movements
July 1986

The Consumer Price Index for All Urban Consumers (CPI-U) for July at 328.0 (1967 = 100) was virtually unchanged from its level of 327.9 in June before seasonal adjustment. The CPI-U for July 1986 was 1.6 percent higher than the index in July 1985.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also was virtually unchanged in July prior to seasonal adjustment. The CPI-W for July 1986 was 322.9 (1967 = 100) and was 1.2 percent higher than the index in July 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U was unchanged in July, following increases of 0.2 percent in May and 0.5 percent in June. Energy prices, which had decreased sharply earlier this year before turning upward in May and June, declined 4.1 percent in July. While each of the energy components declined, the index for energy commodities—fuel oil, coal, and bottled gas and motor fuels—dropped 6.3 percent and accounted for over four-fifths of the energy drop. Excluding energy the CPI-U advanced 0.5 percent in July, largely as the result of increases in the indexes for food and shelter. The index for grocery store foods, reflecting advances in prices of meats and poultry, rose 1.3 percent in July after declining 0.2 percent during the first 6 months of 1986. Excluding the food, shelter, and energy components, the CPI rose 0.3 percent in July, the same as in June.

During the first 7 months of 1986, the CPI-U declined at an annual rate of 0.2 percent.

Prices for motor fuels turned down in July and were responsible for the 1.2-percent decline in the transportation index. Gasoline prices—down 6.6 percent in July after advancing 3.1 percent in June—have declined 27.4 percent in the first 7 months of 1986 and were 35.7 percent below their peak level of March 1981. Continued declines in the indexes for used cars and automobile finance charges also contributed to lower transportation costs in July. Used car prices declined 0.5 percent in July and were 4.4 percent lower than a year ago. Automobile finance charges dropped 1.2 percent in July to a point 10.4 percent below their year-earlier levels. The indexes for new cars and automobile insurance—up 0.4 and 0.9 percent, respectively—continued to increase, but by less than in June. The index for public transportation rose 0.6 percent, primarily due to a 1.1-percent rise in fares for intracity mass transit.

The housing component, which increased 0.5 percent in June, was virtually unchanged in July, largely because of a decline in the index for fuel and other utilities. The indexes for electricity and natural gas, which had surged upward in June after declining in each

Other goods and services	1.0	.5	.4	.4	.2	.3	1.0	6.3	6.0

of the 3 preceding months, dropped in July, down by 0.3 and 3.2 percent, respectively. Fuel oil prices—down 5.8 percent in July—declined for the seventh consecutive month and were 39 percent below their peak level of April 1981. Charges for telephone services, which rose 1.9 percent in June, were unchanged in July as a 1.1-percent increase in charges for local telephone services was offset by a 3.8-percent drop in charges for interstate toll calls. Shelter costs rose 0.4 percent in July, following increases of 0.1 and 0.2 percent in May and June, respectively. Within the shelter component, renters' costs rose 0.7 percent, homeowners' costs, 0.4 percent, and maintenance and repair costs, 0.7 percent. The index for household furnishings and operations rose 0.2 percent in July, the same as in June.

The food and beverage component rose 0.8 percent in July, following a 0.1-percent increase in June. Grocery store food prices advanced 1.3 percent for their largest monthly increase since January 1984 largely on the strength of a 3.2-percent rise in the index for meats, poultry, fish, and eggs. All major categories within this group rose substantially. Beef prices—up 1.2 percent in July—increased for the second consecutive month after declining in each of the first 5 months of 1986. Pork prices, which increased 2.0 percent in June, rose 6.8 percent in July. Poultry prices, reflecting in part drought conditions in the southeastern United States, rose 7.4 percent in July, continuing the pattern of large increases for the third consecutive month. Prices for fish and seafood and for eggs increased 2.1 and 1.9 percent, respectively, in July. A turnaround in fruit and vegetable prices—up 0.8 percent in July after declining 2.8 percent in June—also contributed to higher grocery store food prices in July. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.2 and 0.3 percent, respectively.

Prices of medical care rose 0.5 percent in July, following a 0.7-percent increase in June. The index for medical care commodities— prescription drugs, nonprescription drugs, and medical supplies—rose 1.0 percent. The index for medical care services increased 0.4 percent, with costs of physicians' services and hospital rooms up 0.5 and 0.2 percent, respectively.

The index for apparel and upkeep increased 0.2 percent in July, following seasonal adjustment. This represents only the second month in which this index has increased so far this year. During the first 7 months of 1986, the apparel and upkeep index has declined at a 1.7-percent seasonally adjusted annual rate.

The entertainment index increased 0.2 percent in July as a 0.5-percent rise in charges for entertainment services more than offset declines in prices for entertainment commodities.

The index for other goods and services rose 0.9 percent in July, after increasing 0.4 percent in each of the preceding 4 months. The July advance was largely due to a 2.1-percent increase in prices for tobacco products.

CPI for Urgan Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers was unchanged in July.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

Domestically produced farm food		284.6	288.9	2.3	1.5	1.0	.0	1.4
Selected beef cuts [1]		264.1	266.8	1.1	1.0	-.5	.0	1.0
Imported food and fishery products [4]	12/77	152.2	152.8	6.9	.4	.0	-.7	.8

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Other alcoholic beverages [1 3]	12/77	139.7	139.2	47.9	1.7	1.4	-.6	22.7	.4
Whiskey [1 3]		170.1	170.0	47.8	-1.2	-.7	-.2	20.9	-.5
Alcoholic beverages away from home	12/77	175.5	175.9	13.1	7.8	3.1	7.1	10.4	5.1
Special indexes:									
Domestically produced farm food		284.3	288.3	1.7	6.2	-8.0	10.2	3.9	.7
Selected beef cuts [1]		264.1	266.8	-2.3	20.6	-13.5	2.3	8.6	-5.9
Imported food and fishery products [4]	12/77	152.2	153.4	4.3	8.0	16.1	.3	6.1	7.9

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1967, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

(1967=100, unless otherwise noted)

Group and item	Other index base	Unadjusted indexes		Unadjusted percent change to July 1986 from—		Seasonally adjusted percent change from—		
		June 1986	July 1986	July 1985	June 1986	Apr. to May	May to June	June to July
Housing		361.2	361.5	2.8	0.1	-0.1	0.5	0.0
Shelter		401.6	403.5	5.3	.5	.1	.2	.4

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [5]	2	12/77	172.6	-	174.1	-	-	-	-	.9	.9	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 14. Consumer Price Index for All Urban Consumers: Selected areas, food at home expenditure categories

(1967 = 100, unless otherwise noted)

Area, region, and population size class	Other index base	Total food at home	Cereals and bakery products	Meats, poultry, fish, and eggs [1]	Dairy products	Fruits and vegetables	Other foods at home [1]

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 2 (See footnote 1 table 13) will appear next month.

[2] Indexes on a October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes are on a November 1977=100 base unless otherwise indicated.

[5] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[6] Indexes on a November 1982=100 base.

[7] Index on a June 1978=100 base in Miami, Fla.

[8] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[9] Indexes on a June 1978=100 base.

[10] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[11] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[12] Indexes on an August 1981=100 base.

[13] Indexes are on the bases listed below:

Anchorage, Alaska.....January 1978=100.
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania...November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif.....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[14] Data for Northeast, Pa. will no longer be published after December 1986.

[15] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[16] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[17] Index on a June 1978=100 base in San Diego, Calif.

[18] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[19] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base' in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

West/D [5]	2	12/77	173.9	-	175.4	-	-	-	-	.7	.9	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 19. Consumer Price Index for Urban Wage Earners and Clerical Workers : Selected areas, food at home expenditure categories

West/B	.2	.6	1.4	.6	-3.2	.3
Northeast/C	.5	-.4	1.8	-.2	1.6	-.8
North Central/C	1.7	.3	4.7	-.1	.9	.1
South/C	1.3	.7	4.0	.2	.2	-.1
West/C	1.0	1.6	4.5	-.3	-3.4	.2
Northeast/D [4]	2.1	.3	3.8	-.1	5.3	.1
North Central/D	1.7	-.5	4.9	2.2	.6	-.3
South/D	1.5	.4	4.4	-.3	1.9	-.6
West/D [4]	.9	-.1	3.2	.6	.1	-.1

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 2 (See footnote 1 table 18) will appear next month.

[2] Indexes on an October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes on a November 1977=100 base unless otherwise indicated.

[5] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[6] Indexes on a November 1984=100 base.

[7] Index on a June 1978=100 base in Miami, Fla.

[8] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[9] Indexes on a June 1978=100 base.

[10] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[11] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[12] Indexes on an August 1981=100 base.

[13] Indexes are on the bases listed :

Anchorage, Alaska.....January 1978=100.
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November 1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania....November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif. .....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[14] Data for Northeast, Pa. will no longer be published after December 1986.

[15] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[16] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[17] Index on a June 1978=100 base in San Diego, Calif.

[18] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[19] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A - More than 1,250,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

[1] The population size classes are aggregations of areas which have urban population as defined below:
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base.

[4] Indexes on an August 1981=100 base.

Nondurables less food	155.9	-2.7	-3.2	160.4	-3.5	-5.0	160.4	-1.5	-3.4
Nondurables	160.1	-.2	-.7	163.7	-.8	-1.9	161.0	.3	-1.2
Services less rent of shelter [2]	119.5	5.8	2.0	117.6	6.1	1.9	120.2	6.1	3.2
Services less medical care	206.4	6.8	2.2	197.0	4.9	1.1	178.5	5.2	2.5

[1] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A - More than 1,250,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

[2] Indexes on a December 1982=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.
NA Data not available for publication.

Table S5. Consumer Price Index for all urban consumers: Semiannual averages for selected areas [1], by expenditure category and commodity and service group —Continued

(1967=100)

Group and item	San Francisco, Oakland, Calif.			Seattle-Everett, Wash.			Washington, D.C.-Md.-Va.		
	Index	Percent change from-		Index	Percent change from-		Index	Percent change from-	
	1st half 1986	1st half 1985	2nd half 1985	1st half 1986	1st half 1985	2nd half 1985	1st half 1986	1st half 1985	2nd half 1985
Commodity and service group									
All items	340.8	3.2	1.4	324.9	1.3	0.6	329.8	3.5	1.4
Commodities	284.8	-.9	-.2	279.7	-1.4	-1.3	286.2	.8	-.2
Food and beverages	309.4	2.6	2.3	295.9	3.1	2.4	325.3	4.2	2.8
Commodities less food and beverages	269.5	-3.2	-1.8	268.5	-3.8	-3.3	260.3	-1.3	-2.0
Nondurables less food and beverages	262.1	-5.1	-3.9	278.5	-4.7	-5.8	275.3	-4.2	-6.2
Durables	283.2	-.4	1.3	268.5	-2.5	.0	249.4	3.4	4.9
Services	420.9	6.9	2.8	400.0	4.1	2.6	390.7	6.0	2.8
Medical care services	439.9	8.0	2.9	424.7	3.1	2.0	489.5	8.0	3.9
Special indexes:									
All items less shelter	308.9	1.3	.7	297.9	.2	.0	311.1	2.4	.8
All items less medical care	336.8	2.9	1.3	320.7	1.1	.5	323.5	3.3	1.3
All items less energy [9]	181.6	4.7	2.7	177.1	2.8	1.8	175.8	5.0	2.7
Energy [5]	190.0	-10.0	-10.0	191.5	-11.4	-10.6	175.0	-7.7	-9.7
Commodities less food	267.0	-2.7	-1.5	266.7	-3.5	-3.1	261.9	-.9	-1.7
Nondurables less food	257.2	-4.2	-3.4	273.8	-4.2	-5.3	276.3	-3.6	-5.6
Nondurables	287.4	-1.1	-.7	288.3	-.9	-1.8	301.6	-.1	-1.8
Services less rent of shelter [29]	117.7	5.4	2.3	116.0	3.3	2.7	121.9	5.2	2.3
Services less medical care	416.6	6.8	2.8	395.2	4.2	2.6	378.2	5.8	2.7

See footnotes at end of table.

Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Indexes are on an October 1967=100 base, unless otherwise indicated.

[3] Index is on a May-October 1960=100 base, for Anchorage, Alaska.

[4] Indexes are on a November 1982=100 base, for Anchorage, Alaska; Baltimore, Md.; and Boston, Mass. Index is on a December 1982=100 base for Atlanta, Ga.

[5] Indexes are on a June 1978=100 base.

[6] Index is on a June 1978=100 base for Anchorage, Alaska.

[7] Indexes are on a January 1976=100 base for Baltimore, Md.; Boston, Mass.; and Atlanta, Ga. Index is on a June 1978=100 base for Anchorage, Alaska.

[8] Indexes are on an August 1981=100 base.

[9] Indexes are on the bases listed below:

Anchorage, Alaska	January 1978=100.
Atlanta, Ga.	December 1977=100.
Baltimore, Md.	March 1978=100.
Boston, Mass.	January 1978=100.
Buffalo, N.Y.	February 1978=100.
Chicago, Ill.	December 1977=100.
Cincinnati, Ohio	March 1978=100.
Cleveland, Ohio	February 1978=100.
Dallas, Texas	February 1978=100.
Denver, Colo.	January 1978=100.
Detroit, Mich.	December 1977=100.
Honolulu, Hawaii	December 1977=100.
Houston, Texas	April 1978=100.
Kansas City, Missouri	December 1977=100.
Los Angeles, Calif.	December 1977=100.
Miami, Fla.	November 1977=100.
Milwaukee, Wis.	November 1977=100.
Minneapolis, Minn.	April 1978=100.
New York, N.Y.	December 1977=100.
Philadelphia, Pa.	December 1977=100.
Pittsburgh, Pa.	April 1978=100.
Portland, Oreg.	January 1978=100.
St. Louis, Missouri	March 1978=100.
San Diego, Cal.	November 1977=100.
San Francisco, Cal.	December 1977=100.
Seattle, Wash.	November 1977=100.
Washington, D.C.	November 1977=100.

[10] Index is on a November 1963=100 base for Buffalo, N.Y.

[11] Index is on a November 1982=100 base for Cincinnati, Ohio. Indexes are on a December 1982=100 base for Buffalo, N.Y.; Chicago, Ill.; and Cleveland, Ohio.

[12] Indexes are on a June 1978=100 base in Cincinnati, Ohio; and Cleveland, Ohio.

[13] Indexes are on a January 1976=100 base.

[14] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Dallas, Texas	November 1963=100.
Denver, Colo.	January 1964=100.
Honolulu, Hawaii	December 1963=100.

[15] Index is on a November 1982=100 base for Denver, Colo. Indexes are on a December 1982=100 base for Dallas, Texas; Detroit, Mich.; and Honolulu, Hawaii.

[16] Index is on a June 1978=100 base for Denver, Colo.

[17] Indexes are on a January 1976=100 base for Dallas, Texas; Detroit, Mich.; and Honolulu, Hawaii. Index is on a June 1978=100 base for Denver, Colo.

[18] Indexes are on a November 1977=100 base unless otherwise indicated.

[19] Index is on a November 1982=100 base for Miami, Fla. Indexes are on a December 1982=100 base for Houston, Texas; Kansas City, Missouri; and Los Angeles, Calif.

[20] Index is on a June 1978=100 base for Miami, Fla.

[21] Index is on a June 1978=100 base for Miami, Fla. Indexes are on a January 1976=100 base for Houston, Texas; Kansas City, Mo.; and Los Angeles, Calif.

[22] Index is on a November 1982=100 base for Milwaukee, Wis. Indexes are on a December 1982=100 for Minneapolis, Minn.; New York, N.Y.; and Philadelphia, Pa.

[23] Index is on a February 1965=100 base for San Diego, Calif.

[24] Index is on an April 1967=100 base for Portland, Oreg.

[25] Indexes are on a November 1982=100 base for Portland, Oreg.; St. Louis, Mo.; and San Diego, Calif. Index is on a December 1982=100 base for Pittsburgh, Pa.

[26] Indexes are on a June 1978=100 base for Pittsburgh, Pa. and San Diego, Calif.

[27] Index is on a June 1978=100 base for Portland, Oreg.

[28] Indexes are on a January 1976=100 base for Pittsburgh, Pa.; St. Louis, Mo.; and San Diego, Calif. Index is on a June 1978=100 base for Portland, Oreg.

[29] Indexes are on a November 1982=100 base for Seattle, Wash.; and Washington, D.C. Index is on a December 1982=100 base for San Francisco, Calif.

[30] Index is on a June 1978=100 base for San Francisco, Calif.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A - More than 1,250,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

[1] The population size classes are aggregations of areas which have urban population as defined below:
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

[2] Indexes on a December 1984 = 100 base.

[3] Indexes on a June 1978 = 100 base.

[4] Indexes on an August 1981 = 100 base.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A - More than 1,250,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

[2] Indexes on a December 1984=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.
[NA] Data not available for publication.

Table S10. Consumer Price Index for all urban wage earners and clerical workers: Semiannual averages for selected areas [1], by expenditure category and commodity and service group—Continued

(1967=100)

Group and item	San Francisco, Oakland, Calif.			Seattle-Everett, Wash.			Washington, D.C.-Md.-Va.		
	Index	Percent change from-		Index	Percent change from-		Index	Percent change from-	
	1st half 1986	1st half 1985	2nd half 1985	1st half 1986	1st half 1985	2nd half 1985	1st half 1986	1st half 1985	2nd half 1985
Commodity and service group									
All items	335.2	2.9	1.3	311.1	0.9	0.4	330.9	2.9	0.7
Commodities	285.9	-1.0	-.3	277.1	-1.6	-1.4	292.8	.1	-1.1
Food and beverages	311.5	2.5	2.3	294.3	3.0	2.3	329.0	3.9	2.6
Commodities less food and beverages	270.7	-3.3	-2.0	264.7	-3.9	-3.3	268.2	-2.0	-3.1
Nondurables less food and beverages	263.9	-5.2	-4.3	277.0	-4.9	-5.9	286.8	-5.4	-8.0
Durables	281.7	-.7	1.2	257.1	-2.7	-.2	250.5	2.4	3.2
Services	411.9	6.9	2.9	373.3	4.1	2.6	390.3	6.0	2.7
Medical care services	439.2	8.2	2.9	428.2	3.7	2.3	516.1	8.1	3.9
Special indexes:									
All items less shelter	309.7	1.0	.5	295.7	-.1	-.2	318.2	1.7	.1
All items less medical care	331.1	2.6	1.2	306.5	.8	.2	323.8	2.6	.6
All items less energy [9]	177.9	4.5	2.8	168.7	2.6	1.7	176.0	4.3	2.1
Energy [5]	189.5	-10.1	-10.0	190.9	-11.3	-10.4	174.9	-7.6	-9.6
Commodities less food	268.4	-3.0	-1.8	263.1	-3.7	-3.1	269.5	-1.7	-2.9
Nondurables less food	259.5	-4.6	-3.9	272.7	-4.4	-5.4	287.1	-4.8	-7.4
Nondurables	289.5	-1.2	-.8	286.7	-1.1	-1.9	309.6	-.8	-2.8
Services less rent of shelter [20]	106.3	5.0	2.1	105.0	3.2	2.7	105.9	5.0	2.2
Services less medical care	406.7	6.8	2.9	365.8	4.1	2.6	375.1	5.8	2.6

See footnotes at end of table.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Indexes are on an October 1967=100 base, unless otherwise indicated.

[3] Index is on a May-October 1960=100 base, for Anchorage, Alaska.

[4] Indexes are on a November 1984=100 base, for Anchorage, Alaska; Baltimore, Md.; and Boston, Mass. Index is on a December 1984=100 base for Atlanta, Ga.

[5] Indexes are on a June 1978=100 base.

[6] Index is on a June 1978=100 base for Anchorage, Alaska.

[7] Indexes are on a January 1976=100 base for Baltimore, Md.; Boston, Mass.; and Atlanta, Ga. Index is on a June 1978=100 base for Anchorage, Alaska.

[8] Indexes are on an August 1981=100 base.

[9] Indexes are on the bases listed below:

Anchorage, Alaska	January 1978=100.
Atlanta, Ga.	December 1977=100.
Baltimore, Md.	March 1978=100.
Boston, Mass.	January 1978=100.
Buffalo, N.Y.	February 1978=100.
Chicago, Ill.	December 1977=100.
Cincinnati, Ohio	March 1978=100.
Cleveland, Ohio	February 1978=100.
Dallas, Texas	February 1978=100.
Denver, Colo.	January 1978=100.
Detroit, Mich.	December 1977=100.
Honolulu, Hawaii	December 1977=100.
Houston, Texas	April 1978=100.
Kansas City, Missouri	December 1977=100.
Los Angeles, Calif.	December 1977=100.
Miami, Fla.	November 1977=100.
Milwaukee, Wis.	November 1977=100.
Minneapolis, Minn.	April 1978=100.
New York, N.Y.	December 1977=100.
Philadelphia, Pa.	December 1977=100.
Pittsburgh, Pa.	April 1978=100.
Portland, Oreg.	January 1978=100.
St. Louis, Missouri	March 1978=100.
San Diego, Cal.	November 1977=100.
San Francisco, Cal.	December 1977=100.
Seattle, Wash.	November 1977=100.
Washington, D.C.	November 1977=100.

[10] Index is on a November 1963=100 base for Buffalo, N.Y.

[11] Index is on a November 1984=100 base for Cincinnati, Ohio. Indexes are on a December 1984=100 base for Buffalo, N.Y.; Chicago, Ill.; and Cleveland, Ohio.

[12] Indexes are on a June 1978=100 base in Cincinnati, Ohio; and Cleveland, Ohio.

[13] Indexes are on a January 1976=100 base.

[14] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Dallas, Texas	November 1963=100.
Denver, Colo.	January 1964=100.
Honolulu, Hawaii	December 1963=100.

[15] Index is on a November 1984=100 base for Denver, Colo. Indexes are on a December 1984=100 base for Dallas, Texas; Detroit, Mich.; and Honolulu, Hawaii.

[16] Index is on a June 1978=100 base for Denver, Colo.

[17] Indexes are on a January 1976=100 base for Dallas, Texas; Detroit, Mich.; and Honolulu, Hawaii. Index is on a June 1978=100 base for Denver, Colo.

[18] Indexes are on a November 1977=100 base unless otherwise indicated.

[19] Index is on a November 1984=100 base for Miami, Fla. Indexes are on a December 1984=100 base for Houston, Texas; Kansas City, Missouri; and Los Angeles, Calif.

[20] Index is on a June 1978=100 base for Miami, Fla.

[21] Index is on a June 1978=100 base for Miami, Fla. Indexes are on a January 1976=100 base for Houston, Texas; Kansas City, Mo.; and Los Angeles, Calif.

[22] Index is on a November 1984=100 base for Milwaukee, Wis. Indexes are on a December 1984=100 for Minneapolis, Minn.; New York, N.Y.; and Philadelphia, Pa.

[23] Index is on a February 1965=100 base for San Diego, Calif.

[24] Index is on an April 1967=100 base for Portland, Oreg.

[25] Indexes are on a November 1984=100 base for Portland, Oreg.; St. Louis, Mo.; and San Diego, Calif. Index is on a December 1984=100 base for Pittsburgh, Pa.

[26] Indexes are on a June 1978=100 base for Pittsburgh, Pa. and San Diego Calif.

[27] Index is on a June 1978=100 base for Portland, Oreg.

[28] Indexes are on a January 1976=100 base for Pittsburgh, Pa.; St. Louis, Mo.; and San Diego, Calif. Index is on a June 1978=100 base for Portland, Oreg.

[29] Indexes are on a November 1984=100 base for Seattle, Wash.; and Washington, D.C. Index is on a December 1984=100 base for San Francisco, Calif.

[30] Index is on a June 1978=100 base for San Francisco, Calif.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for July 1986		Average price per KWH of electricity		Range of KWH consumption for July 1986	
	June 1986	July 1986	Low	High	June 1986	July 1986	Low	High
Area [1]								
U.S. city average [2]	$0.628	$0.601	1	1,291	$0.080	$0.080	3	7,512
Chicago, Ill.-Northwestern Ind.	.464	.474	22	634	.137	.138	169	6,708

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

[6] The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Table P-3. Average prices for gasoline, U.S. city average and selected areas (Per gallon)

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7-13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

Employee Benefits in Medium and Large Firms, 1985
U.S. Department of Labor
Bureau of Labor Statistics
July 1986
Bulletin 2262

The Bureau of Labor Statistics issues its 1985 Bulletin on employee benefits in medium and large firms. This survey is the seventh in an annual series.

Data available

- Incidence and detailed characteristics of 14 private sector employee benefits paid for at least in part by the employer: Lunch and rest periods, holidays, vacations, and personal, funeral, jury duty, military, and sick leave; sickness and accident, long-term disability, health, and life insurance; and private retirement/capital accumulation plans. Included in the retirement data is information on defined benefit plans, such as benefit formulas and pension replacement rates, and on defined contribution plans, such as salary reduction or 401 (k) plans.
- Incidence data on 17 other employee benefits, including financial counseling, prepaid legal services, and child care.

Coverage

- Major benefits in medium and large firms, nationwide.
- Minimum employment in establishments covered is generally 100 or 250 employees, depending on the industry.

Source of data

- Sample of about 1,500 establishments in a cross-section of the Nation's private industries; primarily by personal interview.

Uses

- Union contract negotiations.
- Conciliation and arbitration in public and private sectors.
- Development of legislation affecting the welfare of workers.

The *CPI Detailed Report* is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year $16 domestic, and $20 foreign. Single copy domestic, $6; foreign, $7.50. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC, and at additional mailing offices.

October	November 25	December	January 21

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements: See page 3 for further details.

Price Movements
August 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.2 percent before seasonal adjustment in August to a level of 328.6 (1967 = 100). For the 12-month period ended in August, the CPI-U has increased 1.6 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 0.2 percent in August, prior to seasonal adjustment. The August 1986 CPI-W level of 323.4 (1967 = 100) was 1.2 percent higher than the index in August 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in August, following no change in July. Price changes in the energy and food components continued to dominate the movement of the CPI. The energy component declined 1.9 percent in August, reflecting a further drop in prices for gasoline and fuel oil. In contrast, the food index rose 0.9 percent for the second consecutive month, again primarily due to sharp advances in meat, poultry, and egg prices. Excluding food and energy, the CPI-U rose 0.3 percent in August, the same as the average monthly increase for the first 7 months of 1986.

During the first 8 months of 1986, the overall CPI-U rose at a seasonally adjusted annual rate of 0.1 percent. Energy prices declined at a 25.8-percent annual rate during this period. Excluding energy, the CPI-U advanced at a 3.7-percent annual rate during the first 8 months of 1986, which compares with a 4.0-percent increase in the 12 months ended in December 1985.

The food and beverage component rose 0.9 percent in August, following a 0.8-percent increase in July. Grocery store food prices advanced 1.2 percent, primarily due to another 3.2-percent rise in the index for meats, poultry, fish, and eggs. During the first 5 months of 1986, prices for beef, pork, poultry, and eggs all declined, but each has turned up sharply in the past 3 months. Beef prices rose 2.1 percent in August, bringing their advance to 3.7 percent since May. Pork prices increased 4.5 percent in August and were 13.9 percent higher than 3 months earlier. Prices for poultry—up 6.1 percent in August—have increased 16.6 percent in the 3-month period ended in August. Egg prices rose 10.9 percent in August and were up 16.5 percent in the past 3 months. Among other grocery store foods in August, prices for fruits and vegetables increased 0.7 percent, largely due to a 14.3-percent rise in prices for apples. The index for cereal and bakery products increased 0.6 percent, while the indexes for dairy products and other foods at home were unchanged. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.4 percent and declined 0.2 percent, respectively.

The index for transportation, reflecting another drop in motor fuel prices, declined 0.9 percent in August. Gasoline prices—down 4.7 percent in August—declined 30.8 percent in the first 8 months of 1986 and were 38.7 percent below their peak level of March 1981. Con-

Other goods and services	.5	.4	.4	.2	.3	1.0	.6	7.6	6.1

tinued declines in the indexes for used cars and automobile finance charges also contributed to lower transportation costs in August. Used car prices—down 0.4 percent in August—declined for the seventh consecutive month and were 4.3 percent below their level a year ago. Automobile finance charges dropped 1.2 percent in August to a point 9.2 percent below their year-earlier levels. The indexes for new cars and automobile insurance—up 0.3 and 0.1 percent, respectively—continued to advance, but by less than in recent months. The increase in the cost of automobile insurance, which has advanced 13.3 percent in the past 12 months, was the smallest rise in 2 years. The index for public transportation was unchanged in August as a decline in airline fares offset moderate increases in fares for most other modes of public transportation.

The housing component, which was unchanged in July, rose 0.2 percent in August, largely due to a turnaround in the index for fuel and other utilities. Charges for natural gas increased 1.6 percent in August, following a decline of 3.2 percent in July, and more than offset further declines in the indexes for electricity and fuel oil, coal, and bottled gas. Despite the August advance, the index for natural gas was 3.9 percent lower than a year ago. Fuel oil prices—down 1.7 percent in August—declined for the eighth consecutive month and were 40 percent below their peak level of April 1981. Charges for electricity, which decreased slightly in both July and August, were up 2.6 percent over the past 12 months. Shelter costs continued to increase moderately, advancing 0.3 percent in August. Within shelter, renters' costs rose 0.2 percent; homeowners' costs, 0.3 percent; and maintenance and repair costs, 2.0 percent. The index for household furnishings and operations increased 0.4 percent in August.

The medical care component increased 0.6 percent in August, about the same as the average monthly rate of increase so far this year. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.2 percent. The index for medical care services increased 0.6 percent, with the costs of physicians' services and hospital rooms up 0.6 and 0.4 percent, respectively.

The index for apparel and upkeep registered its second consecutive increase, advancing 0.7 percent in August. The introduction of higher priced fall and winter merchandise, particularly women's and girls' clothing, was largely responsible for the advance.

The entertainment component was virtually unchanged in August. The other goods and services component rose 0.6 percent in August, following a 0.9-percent increase in July.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.2 percent in August.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 4. Consumer Price Index for All Urban Consumers: Food expenditure categories, seasonally adjusted, U.S. city average —Continued

(1967=100, unless otherwise noted)

Group and item	Other index base	Seasonally adjusted indexes		Seasonally adjusted annual rate percent change for—					
				3 months ending in—				6 months ending in—	
		July 1986	Aug. 1986	Nov. 1985	Feb. 1986	May 1986	Aug. 1986	Feb. 1986	Aug. 1986
Food away from home		360.4	361.8	4.0	2.4	5.3	3.8	3.2	4.6
Lunch	12/77	174.1	174.5	4.9	2.6	4.8	3.8	3.7	4.3
Dinner	12/77	173.5	174.0	3.4	2.4	3.8	3.3	2.9	3.5
Other meals and snacks	12/77	179.3	179.9	3.8	3.0	6.3	6.5	3.4	6.4
Alcoholic beverages		240.4	239.9	14.5	2.7	1.0	1.7	8.5	1.3
Alcoholic beverages at home	12/77	152.2	152.1	13.8	2.1	.8	.5	7.8	.7
Beer and ale		240.2	240.5	1.2	1.5	1.0	1.2	1.4	1.1
Wine [1]		242.1	241.7	1.4	6.6	.0	2.2	3.9	1.1
Distilled spirits [1 2]	12/77	141.7	141.6	43.5	1.4	.3	-.8	20.6	-.3
Other alcoholic beverages [1 3]	12/77	139.2	138.8	45.9	.9	.9	-1.1	21.3	-.1
Whiskey [1 3]		170.0	170.2	41.8	1.9	-.2	-.5	20.2	-.4
Alcoholic beverages away from home	12/77	175.9	176.1	14.6	5.5	2.8	6.1	10.0	4.5
Special indexes:									
Domestically produced farm food		288.3	292.3	6.3	-5.9	4.5	11.9	.0	8.1
Selected beef cuts [1]		266.8	270.3	14.9	1.6	-10.3	9.7	8.0	-.8
Imported food and fishery products [4]	12/77	153.4	153.1	3.1	18.8	4.0	-.5	10.7	1.7

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

(1967=100, unless otherwise noted)

Group and item	Other index base	Unadjusted indexes		Unadjusted percent change to Aug. 1986 from—		Seasonally adjusted percent change from—		
		July 1986	Aug. 1986	Aug. 1985	July 1986	May to June	June to July	July to Aug.

Housekeeping and home maintenance services [1]		391.8	393.0	2.0	.3	.1	.2	.3

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

South/D	2	12/77	–	173.9	–	174.3	.9	.2	–	–	–	–
West/D [5]	2	12/77	–	174.1	–	174.9	.9	.5	–	–	–	–

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

South/D	1.9	.5	4.7	.7	.9	.1
West/D [4]	1.5	.7	2.8	.0	2.0	.9

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

[1] Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1982=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[9] Indexes on a January 1976=100 base.

[10] Indexes on an August 1981=100 base.

[11] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[12] After December 1986, this area will be published on a monthly basis.

[13] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D [4]	1.5	.7	2.5	.1	2.2	1.0

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[NA] Data not adequate for publication.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

[1] Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1984=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[9] Indexes on a January 1976=100 base.

[10] Indexes on an August 1981=100 base.

[11] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[12] After December 1986, this area will be published on a monthly basis.

[13] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984 = 100 base.

[4] Indexes on a June 1978 = 100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981 = 100 base.

[NA] Data not adequate for publication.

Table P-1. Average residential prices for utility (piped) gas, electricity, and fuel oil, U.S. city average and selected areas

Area, region and population size class	Utility (piped) gas				Electricity		Fuel oil #2	
	per 40 therms		per 100 therms		per 500 KWH		per gallon

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7-13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

Employee Benefits in Medium and Large Firms, 1985
U.S. Department of Labor
Bureau of Labor Statistics
July 1986
Bulletin 2262

The Bureau of Labor Statistics issues its 1985 Bulletin on employee benefits in medium and large firms. This survey is the seventh in an annual series.

Data available

- Incidence and detailed characteristics of 14 private sector employee benefits paid for at least in part by the employer: Lunch and rest periods, holidays, vacations, and personal, funeral, jury duty, military, and sick leave; sickness and accident, long-term disability, health, and life insurance; and private retirement/capital accumulation plans. Included in the retirement data is information on defined benefit plans, such as benefit formulas and pension replacement rates, and on defined contribution plans, such as salary reduction or 401 (k) plans.
- Incidence data on 17 other employee benefits, including financial counseling, prepaid legal services, and child care.

Coverage

- Major benefits in medium and large firms, nationwide.
- Minimum employment in establishments covered is generally 100 or 250 employees, depending on the industry.

Source of data

- Sample of about 1,500 establishments in a cross-section of the Nation's private industries; primarily by personal interview.

Uses

- Union contract negotiations.
- Conciliation and arbitration in public and private sectors.
- Development of legislation affecting the welfare of workers.

Publications are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or the Bureau of Labor Statistics, Publications Sales Center P.O. Box 2145 Chicago, Ill. 60690

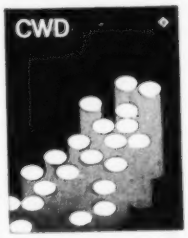
BLS Periodical Prices Reduced

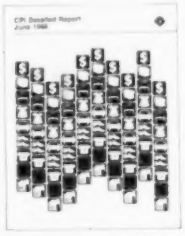
BLS periodicals provide timely information on employment, occupations, wages, and prices. Subscriptions now are available at greatly reduced prices. In addition, newly available 2-year subscriptions guarantee the low prices for the next 2 years.

Monthly Labor Review
the oldest and most authoritative Government research journal in economics and social sciences. Regular features include current labor statistics and developments in industrial relations.
$16
~~$24~~ a year



Current Wage Developments
reports monthly on specific wage and benefit changes from collective bargaining agreements. Includes data on strikes or lockouts, major agreements expiring, and compensation changes.
$12
~~$21~~ a year

Occupational Outlook Quarterly
helps students and guidance counselors learn about new occupations, training opportunities, salary trends, and career counseling programs. Written in nontechnical language and illustrated in color.
$5
~~$11~~ a year



CPI Detailed Report
is the most comprehensive report on monthly consumer price indexes and rates of change.
$16
~~$25~~ a year

Employment and Earnings
gives current monthly employment and earnings statistics for the Nation as a whole, for States and for more than 200 areas. Included are household and establishment data seasonally and not seasonally adjusted. Includes annual supplement.
$22
~~$31~~ a year

Producer Price Indexes
includes monthly price movements of both farm and industrial commodities, by industry and stage of processing. Includes annual supplement.
$21
~~$29~~ a year

The *CPI Detailed Report* is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year $16 domestic, and $20 foreign. Single copy domestic, $6; foreign, $7.50. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC, and at additional mailing offices.

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 5 for further details.

Price Movements
September 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.5 percent before seasonal adjustment in September to a level of 330.2 (1967=100). For the 12-month period ended in September, the CPI-U has increased 1.8 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 0.5 percent in September, prior to seasonal adjustment. The September 1986 CPI-W level of 324.9 (1967=100) was 1.4 percent higher than the index in September 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0.3 percent in September following a 0.2-percent increase in August. The energy index, reflecting the turnaround in petroleum-based energy prices, rose 0.7 percent in September, following substantial declines in the 2 preceding months. Food prices rose in September, but the increase was smaller than in August because of sharp declines in poultry and egg prices. Excluding food and energy, the CPI-U rose 0.3 percent in September, the same as the average monthly increase for the first 8 months of 1986.

During the first 9 months of 1986, the CPI-U advanced at a seasonally adjusted annual rate (SAAR) of 0.6 percent. This compares with annual increases of about 4 percent in each of the preceding 4 years. The sharp drop in energy prices—down at a 22.6-percent SAAR during the first 3 quarters of 1986—was almost entirely responsible for the deceleration in the overall index. Excluding energy, the CPI-U has risen at an annual rate of 3.7 percent thus far in 1986, compared with increases between 4 and 4. 5 percent in each of the prior 4 years. The annual rates of changes for selected groups during the last several years and the first 9 months of 1986 are shown below.

	Annual percent changes				*Seasonally adjusted annual rate—*
	12 months ended December				*9 months ended June 1986*
	1982	*1983*	*1984*	*1985*	
All Items	3.9	3.8	4.0	3.8	0.6
Energy	1.3	−.5	.2	1.8	−22.6
Energy commodities	−5.0	−3.2	−1.9	3.4	−36.6
Energy services	14.1	4.1	3.4	−0.5	−.4
All Items less energy	4.2	4.4	4.5	4.0	−.4
Food	3.1	2.6	3.8	2.7	3.7
Shelter	2.4	4.7	5.2	6.0	5.1
Used cars	10.9	14.4	7.0	−1.9	−5.7
All other items	5.6	4.1	4.1	4.2	3.9
Other commodities	4.1	3.3	2.3	3.0	2.5
Other services	7.3	4.9	6.0	5.4	5.3

The transportation index rose 0.4 percent in September, following sharp declines in each of the 2 preceding months. Gasoline prices advanced 2.5 percent in September, but they were still at the same level as in mid-1979 and were 36.1 percent below their peak level of March 1981. Used car prices—up 0.2 percent in September—registered their first increase since January. New car prices also rose 0.2 per-

cent in September, following seasonal adjustment. On the other hand, automobile finance charges, largely reflecting manufacturers' sponsored financing, dropped 6.1 percent in September. These charges have declined 14.5 percent during the first 9 months of 1986. Automobile insurance costs rose 0.6 percent in September and have increased 13.6 percent in the past 12 months. The index for public transportation rose 0.1 percent in September, following no change in August.

The food and beverage index rose 0.4 percent in September. Grocery store food prices also rose 0.4 percent, after registering increases of 1.3 and 1.2 percent in July and August, respectively. A much smaller increase in the index for meats, poultry, fish, and eggs was principally responsible for the slowdown. In particular, poultry and egg prices, which had risen sharply in July and August, declined 2.2 and 8.0 percent, respectively, in September. Beef and pork prices rose substantially again in September, but by less than in August. In the past 4 months, beef prices have risen 5.2 percent and pork prices 16.6 percent. Partially offsetting the slowdown in prices for meats, poultry, fish, and eggs was an acceleration in fruit and vegetable prices—up 1.4 percent in September. Each of the other major grocery store food groups reflected very little price movement in September. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.5 and 0.2 percent, respectively.

The housing component rose 0.2 percent in September, the same as in August. A larger advance in shelter costs—up 0.5 percent in September—was offset by a decline in the index for fuel and other utilities and a smaller increase in the index for household furnishings and operations. The index for fuel and other utilities turned down again in September, reflecting a sharp drop in the index for natural gas, which declined 2.8 percent in September and was 6.2 percent lower than a year ago. In contrast, prices for fuel oil—up 1.1 percent—and charges for electricity—up 0.4 percent—turned upward in September. The increase in fuel oil prices was the first since last December. Despite the September advance, fuel oil prices have declined 32.2 percent in the first 9 months of 1986, and 39.4 percent from their peak level of April 1981. Charges for telephone services decreased 0.4 percent in September.

The index for apparel and upkeep registered its third consecutive increase, advancing 0.8 percent in September. Clothing prices, which declined at a 3.6-percent annual rate in the first half of 1986, have advanced at a 7.8-percent annual rate in the third quarter, reflecting the introduction of higher priced fall and winter merchandise. Charges for apparel services rose 0.6 percent in September, their largest increase since January.

The medical care component increased 0.6 percent in September, the same as in August. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.5 percent. The index for medical care services increased 0.7 percent, with the costs of physicians' services and hospital rooms up 1.0 and 0.4 percent, respectively.

The index for entertainment rose 0.3 percent in September, after registering no change in August. An increase in fees for participant sports more than offset a decline in prices for entertainment commodities.

The other goods and services component decreased 0.1 percent on a seasonally adjusted basis in September, reflecting declines in the indexes for tuition and other school fees, school books and supplies, and personal care. (Prior to seasonal adjustment, the indexes for tuition and school books rose 6.8 and 3.3 percent, respectively.

Reconciling Two Measures of Consumer Price Change: Second Quarter 1986

This article continues the analysis last presented in the March 1986 *CPI Detailed Report* of differences between the two price measures—the Consumer Price Index (CPI-U) published by the Bureau of Labor Statistics and the Implicit Price Deflator for Personal Consumption Expenditures (PCE) published by the Bureau of Economic Analysis (BEA) of the Department of Commerce. More information on the technique of reconciliation appears in the September 1981 *Monthly Labor Review.*[1]

Effective December 1985, BEA rebased the PCE data from a 1972 to a 1982 reference base.[2] With the use of a 1982 reference base, the residual housing effect,[3] which contributed a substantial portion of the cumulative difference between the CPI and PCE through 1982, is no longer a contributing factor, since both the CPI and PCE have used a rental equivalence measure of homeowners' costs since the beginning of 1983.

[1] Jack E. Triplett," Reconciling the CPI and PCE Deflator," *Monthly Labor Review*, Sept. 1981, pp. 3-15. Subsequent reconciliations appeared in the January, May, July, and October 1982 *Review*, and in the February 1983 *Review*.

[2] The November 1985 *CPI Detailed Report* contains the final reconciliation (running throught the third quarter of 1985) of the CPI and PCE using 1972 weights.

[3] "Reconciling Two Measures of Consumer Price Change: Second Quarter 1984," *CPI Detailed Report*, July 1984, pp. 4-6, for an explanation of the residual housing effect. A subsequent reconciliation appeared in the October 1984 *Report*.

Cumulative differences

The PCE remained higher than the CPI through the second quarter of 1986 (see table C). Both indexes decreased from their first quarter levels, reflecting falling oil prices. The CPI-U has advanced 12.9 percent since 1982, while the current weight PCE has risen 13.4 percent. At the end of the second quarter the difference between the cumulative percent changes in the two indexes was 0.5 percentage point.

The net difference is the result of two partially offsetting factors—weighting differences and an aggregate of "other" effects. Weighting differences, which reflect the cumulative effect of using fixed 1982 weights rather than current, or moving, weights accounted for a second quarter 1986 fixed weight index which was 1.1 percentage points higher than the current-weight PCE. Of this difference, 0.4 percentage point arose in the first two quarters of 1986 alone. The weighting effect has been more than offset by a 1.6-percentage-point difference in "other" effects as measured by a comparison of the CPI-U with the fixed-weight PCE . "Other" effects historically have resulted, in part, from differences in seasonal adjustment methods, different market baskets, and the use of Consumer Expenditure Survey data for determin-

PCE: 1982 weight	100.0	104.0	108.4	112.4	110.8	112.0	112.8	114.1	114.6	114.5
Difference: Other effect	0	-.8	-.8	-1.0	-.8	-1.0	-1.0	-1.2	-1.2	-1.6

Note: The Bureau of Economic Analysis periodically revises PCE data. For this reason, some of the figures in tables C and D differ from those previously published.

ing the weight distribution in the CPI as opposed to the use of GNP composition to determine the PCE weighting structure. Weights for the PCE are now based on the composition of the GNP as of 1982, whereas the CPI continues to use weights derived from the 1972-73 Consumer Expenditure Survey. This 10-year gap in weighting further contributes to differences reflected in "other" effects. With the CPI revision scheduled for January 1987, the CPI will begin using weights from the 1982-84 Consumer Expenditure Survey.

Period-to-period differences

Analysis of differences in the annual and quarterly rates of change in the CPI and PCE (see table D) makes use of the chain-weight PCE in place of the current-weight PCE.[4] The CPI-U fell at an annual rate of 1.7 percent from the first to the second quarter. This was 1.4 percent more than the 0.3-percent decrease in the chain-weighted PCE. During the first quarter, the chain-weighted PCE had increased 0.1 percent less than the CPI-U. Comparing the chain-weighted PCE with the fixed 1982-weighted PCE in the second quarter shows an annualized rate for the chain-weighted index which was 0.1-percentage point higher than the falling PCE rate using fixed weights. The second-quarter rates for the CPI-U and the fixed-weights PCE, which determine the "Other" effects showed a 1.3-percent difference.

Table D. Comparison of annual or quarterly percent changes in CPI indexes and Personal Consumption Expenditure price measures, 1984-86[1]

Price measure	1984	1985	1985				1986	
			I	II	III	IV	I	II
CPI-U	4.3	3.6	3.2	4.0	2.6	4.3	1.5	-1.7
PCE: Chain weight	4.0	3.6	3.5	4.0	2.8	4.7	1.4	-.3
Difference: Total effect	.3	.0	-.3	.0	-.2	-.4	.1	-1.4
PCE:1982 weight	4.0	3.7	3.6	4.2	3.0	4.7	1.5	-.4

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky,-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

Chart 1: CPI-U: All items, food and beverages, 1975-86

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 4. Consumer Price Index for All Urbe onsumers: Food expenditure categories, seasonally adjusted, U.S. city average —Continued

(1967=100, unless otherwise noted)

Group and item	Other index base	Seasonally adjusted indexes		Seasonally adjusted annual rate percent change for—					
				3 months ending in—				6 months ending in—	
		Aug. 1986	Sept. 1986	Dec. 1985	Mar. 1986	June 1986	Sept. 1986	Mar. 1986	Sept. 1986
Food away from home		361.8	363.7	3.0	2.7	5.4	4.4	2.9	4.9
Lunch	12/77	174.5	174.9	3.6	2.8	4.7	3.3	3.2	4.0
Dinner	12/77	174.0	174.8	3.6	2.4	3.8	3.7	3.0	3.8
Other meals and snacks	12/77	179.9	181.0	2.3	3.0	8.7	6.0	2.7	7.3
Alcoholic beverages		239.9	240.4	14.9	1.7	2.2	1.3	8.1	1.8
Alcoholic beverages at home	12/77	152.1	152.2	15.7	.8	1.3	.8	8.0	1.1
Beer and ale		240.5	241.1	3.2	-.2	1.5	2.2	1.5	1.9
Wine [1]		241.7	241.2	-2.3	11.2	.8	-.8	4.2	.0
Distilled spirits [1 2]	12/77	141.6	141.9	40.1	1.7	1.1	.0	19.4	.6
Other alcoholic beverages [1 3]	12/77	138.8	139.3	40.0	5.3	.9	-1.1	21.4	-.1
Whiskey [1 3]		170.2	170.3	39.7	.2	.9	.5	18.3	.7
Alcoholic beverages away from home	12/77	176.1	176.6	14.0	4.8	5.7	2.5	9.3	4.1
Special indexes:									
Domestically produced farm food		292.3	294.3	7.3	-7.6	3.9	14.8	-.4	9.2
Selected beef cuts [1]		270.3	271.7	28.2	-9.6	-9.1	12.0	7.7	.9
Imported food and fishery products [4]	12/77	153.1	152.8	2.2	21.3	-1.6	1.6	11.4	.0

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

(1967=100, unless otherwise noted)

Housekeeping and home maintenance services [1]		393.0	393.8	2.1	.2	.2	.3	.2

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [5]	2	12/77	174.1	-	174.9	-	-	-	-	.9	.5	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[h] Revised.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D [4]	.1	.4	.8	-.4	-2.0	.4

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

[1] Areas on pricing schedule 2 (See footnote 1 table 13) will appear next month.

[2] Indexes on a October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes are on a November 1977=100 base unless otherwise indicated.

[5] Revised indexes for Anchorage, Alaska: July 1986=286.3; Semiannual average, first half 1986=289.0

[6] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[7] Revised indexes for Anchorage, Alaska: July 1986=312.8; Semiannual average, first half 1986=315.7

[8] Indexes on a November 1982=100 base.

[9] Index on a June 1978=100 base in Miami, Fla.

[10] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[11] Indexes on a June 1978=100 base.

[12] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[13] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[14] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[15] Indexes on an August 1981=100 base.

[16] Revised indexes for Anchorage, Alaska: July 1986=494.6; Semiannual average, first half 1986=429.7

[17] Revised indexes for Anchorage, Alaska: July 1986=318.0; Semiannual average, first half 1986=320.4

[18] Revised indexes for Anchorage, Alaska: July 1986=551.6; Semiannual average, first half 1986=472.2

[19] Revised indexes for Anchorage, Alaska: July 1986=314.3; Semiannual average, first half 1986=312.0

[20] Indexes are on the bases listed below:

Anchorage, Alaska	January 1978=100.
Baltimore, Md.	March 1978=100.
Boston, Mass.	January 1978=100.
Cincinnati, Ohio-Ky.-Ind.	March 1978=100.
Denver-Boulder, Colo.	January 1978=100.
Miami, Fla.	November1977=100.
Milwaukee, Wis.	November 1977=100.
Northeastern Pennsylvania	November 1977=100.
Portland, Oreg.-Wash.	January 1978=100.
St. Louis, Mo.-Ill.	March 1978=100.
San Diego, Calif.	November 1977=100.
Seattle-Everett, Wash.	November 1977=100.
Washington, D.C.-Md.-Va.	November 1977=100.

[21] Revised indexes for Anchorage, Alaska: July 1986=159.9; Semiannual average, first half 1986=160.4

[22] Revised indexes for Anchorage, Alaska: July 1986=126.6; Semiannual average, first half 1986=121.7

[23] Data for Northeast, Pa. will no longer be published after December 1986.

[24] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[25] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[26] Index on a June 1978=100 base in San Diego, Calif.

[27] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[28] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base' in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

West/D [5]	2	12/77	175.4	-	176.3	-	-	-	-	.9	.5	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[R] Revised.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 2 (See footnote 1 table 18) will appear next month.

[2] Indexes on an October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes on a November 1977=100 base unless otherwise indicated.

[5] Revised indexes for Anchorage, Alaska: July 1986=278.4; Semiannual average, first half 1986=282.0

[6] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[7] Revised indexes for Anchorage, Alaska: July 1986=304.1; Semiannual average, first half 1986=308.0

[8] Indexes on a November 1984=100 base.

[9] Index on a June 1978=100 base in Miami, Fla.

[10] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[11] Indexes on a June 1978=100 base.

[12] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[13] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[14] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[15] Indexes on an August 1981=100 base.

[16] Revised indexes for Anchorage, Alaska: July 1986=464.6; Semiannual average, first half 1986=414.5

[17] Revised indexes for Anchorage, Alaska: July 1986=309.5; Semiannual average, first half 1986=313.5

[18] Revised indexes for Anchorage, Alaska: July 1986=509.8; Semiannual average, first half 1986=448.9

[19] Revised indexes for Anchorage, Alaska: July 1986=309.6; Semiannual average, first half 1986=308.6

[20] Indexes are on the bases listed :

Anchorage, Alaska	January 1978=100.
Baltimore, Md.	March 1978=100.
Boston, Mass.	January 1978=100.
Cincinnati, Ohio-Ky.-Ind.	March 1978=100.
Denver-Boulder, Colo.	January 1978=100.
Miami, Fla.	November 1977=100.
Milwaukee, Wis.	November 1977=100.
Northeastern Pennsylvania	November 1977=100.
Portland, Oreg.-Wash.	January 1978=100.
St. Louis, Mo.-Ill.	March 1978=100.
San Diego, Calif.	November 1977=100.
Seattle-Everett, Wash.	November 1977=100.
Washington, D.C.-Md.-Va.	November 1977=100.

[21] Revised indexes for Anchorage, Alaska: July 1986=154.9; Semiannual average, first half 1986=155.8

[22] Revised indexes for Anchorage, Alaska: July 1986=110.0; Semiannual average, first half 1986=106.3

[23] Data for Northeast, Pa. will no longer be published after December 1986.

[24] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[25] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[26] Index on a June 1978=100 base in San Diego, Calif.

[27] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[28] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

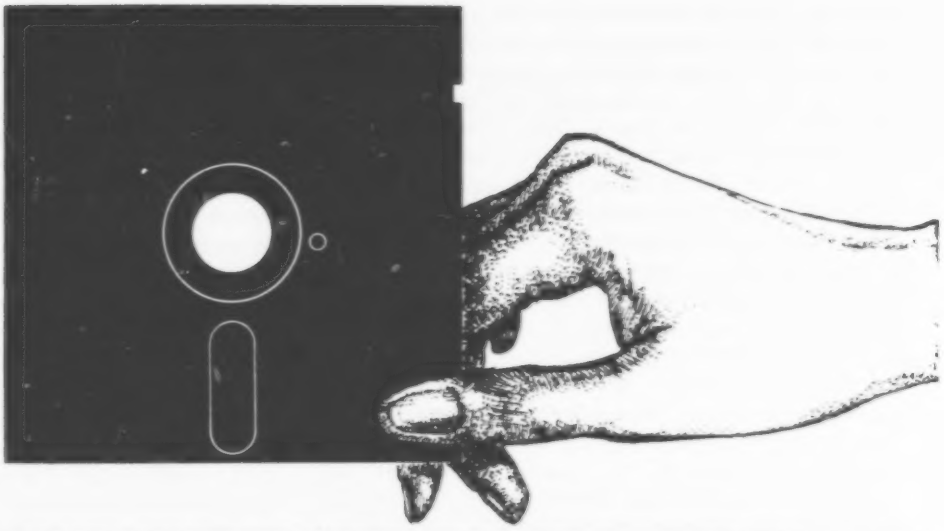
For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

U.S. GOVERNMENT PRINTING OFFICE:1986-181-498/40012

BLS Data Diskettes now available



BLS data users now can store and manipulate the Bureau's data series on their personal, IBM-compatible microcomputers. The following data diskettes are formatted for use with LOTUS 1-2-3.

Monthly

Consumer Price Index—104 items in the U.S. City Average Index and 54 areas in the All-Items Index for the current year to date and the previous year. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Employment, hours, and earnings from the establishment survey—national monthly and annual average data for 249 industrial series for the current year to date and the 3 prior years. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Labor force, employment, and unemployment from the Current Population Survey—monthly and annual average information on the employment and unemployment experience of the Nation's population classified by age, sex, and race for 282 series for the current year to date and the 3 prior years. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Producer Price Indexes—selected commodity groupings of 225 series by stage of processing for the most recent 13 months. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Quarterly

Employment Cost Index—quarterly measures of change in total compensation (wages, salaries, and employer costs for employee benefits) and in wages and salaries only; 180 series beginning in 1980–81 and 120 series from 1975 to the most recent quarter. Single diskette, $35. Annual subscription of 4 quarterly diskettes, $104.

National productivity indexes—63 quarterly labor productivity and cost measures for business, nonfarm business, nonfinancial corporations, and manufacturing from 1947 to the most recent quarter. Also, 24 annual multifactor productivity measures (output per unit of combined labor and capital inputs) for private business, private nonfarm business, and manufacturing from 1948 to the most recent year. Single diskette, $35. Annual subscription of 8 quarterly diskettes, $196.

U.S. export and import price indexes—quarterly export and import price indexes for 450 Standard Industrial Trade Classification categories for the most recent 8 quarters. Single diskette, $35. Annual subscription of 4 quarterly diskettes, $104.

Annual

Economic projections to 1995—average annual output, total employment, hours, and wage and salary employment for 1984 and projected 1985–95 for 150 industries. Single diskette, $35.

Foreign labor statistics—129 annual indexes of manufacturing productivity and labor costs for the United States and 11 foreign countries from 1950 to 1985, and levels of the labor force, unemployment, and related measures for the United States and 9 countries from 1959 to 1985. Single diskette, $35. Annual subscription of 4 diskettes, $104.

Industry productivity data—annual indexes showing change over time in output of an industry, the employee hours expended on the output, and output per employee hour for over 130 industries. Most start in 1958 and go to the most recent year. Also, annual Federal Government productivity indexes showing the change over time in the output of 28 functions, the employee years expended on that output, and output per employee year from 1967 to the most recent fiscal year. Single diskette, $35.

Occupational injury and illness data—annual number of work-related injuries and illnesses or lost workdays per 100 full-time employees from 1981 to 1984. Single diskette, $35.

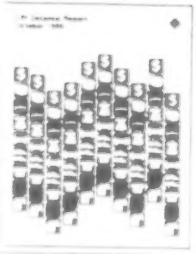
BLS Periodicals

BLS periodicals provide timely information on employment, occupations, wages, and prices.

Monthly Labor Review
the oldest and most authoritative Government research journal in economics and social sciences. Regular features include current labor statistics and developments in industrial relations.
$16 a year

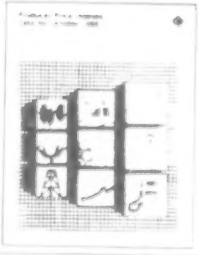
Current Wage Developments
reports monthly on specific wage and benefit changes from collective bargaining agreements. Includes data on strikes or lockouts, major agreements expiring, and compensation changes.
$12 a year

Occupational Outlook Quarterly
helps students and guidance counselors learn about new occupations, training opportunities, salary trends, and career counseling programs. Written in nontechnical language and illustrated in color.
$5 a year



CPI Detailed Report
is the most comprehensive report on monthly consumer price indexes and rates of change.
$16 a year

Employment and Earnings
gives current monthly employment and earnings statistics for the Nation as a whole, for States and for more than 200 areas. Included are household and establishment data, seasonally and not seasonally adjusted. Includes annual supplement.
$22 a year



Producer Price Indexes
includes monthly price movements of both farm and industrial commodities, by industry and stage of processing. Includes annual supplement.
$21 a year

The *CPI Detailed Report* is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year $16 domestic, and $20 foreign. Single copy domestic, $6; foreign, $7.50. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC, and at additional mailing offices.

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements
October 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.1 percent before seasonal adjustment in October to a level of 330.5 (1967=100). For the 12-month period ended in October, the CPI-U has increased 1.5 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was virtually unchanged in October, prior to seasonal adjustment. The October 1986 CPI-W level of 325.0 (1967=100) was 1.2 percent higher than the index in October 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in October following an increase of 0.3 percent in September. The energy index, which had turned upward in September, declined 2.2 percent in October, reflecting decreases in prices for electricity, motor fuel, and fuel oil. Food and shelter costs—up 0.3 and 0.4 percent, respectively—increased slightly less than in September. Excluding food, shelter, and energy, the CPI-U advanced 0.4 percent in October after increasing 0.2 percent in September. Increases in the indexes for new cars, automobile finance charges, and automobile insurance accounted for virtually all of that acceleration.

During the first 10 months of 1986, the CPI-U rose at a seasonally adjusted annual rate of 0.7 percent, held down by energy prices, which declined at an annual rate of 22.7 percent. The CPI-U excluding energy advanced at a 3.8-percent annual rate for the first 10 months of 1986 compared to a 4.0-percent increase in the 12 months ended in December 1985.

The housing component, which rose 0.2 percent in September, was virtually unchanged in October, as declines in the indexes for fuel and other utilities and household furnishings and operations offset an increase in shelter costs. Charges for electricity, reflecting a shift to lower winter rates and some rate restructuring, declined a record 4.4 percent. Fuel oil prices, which recorded their first increase of 1986 in September, turned down in October by 1.4 percent. Although charges for natural gas rose 0.9 percent in October, their prices, as well as those for fuel oil and electricity, were lower in October than at the end of 1985. Shelter costs rose 0.4 percent in October.

The transportation component rose 0.1 percent in October following an increase of 0.4 percent in September. The turnaround in prices for motor fuels caused the smaller October advance. Gasoline prices—down 2.4 percent in October, following a similar September rise—have declined 30.8 percent in the first 10 months of 1986. As of October, gasoline prices were 38.7 percent below their peak level of March 1981. However, most other private transportation components rose more than in September. The new car index rose 0.8 percent, following a 0.2-percent rise in September. Higher priced 1987 models represented about 43 percent of the new car sample in October. (For a report on quality change for 1987 cars, see *Producer Price Indexes Data for October 1986*, page 4.) Automobile financing charges, which dropped a record 6.1 percent in September, rose 3.4 percent, largely due to the elimination of manufacturer financing concessions. Nevertheless, financing charges have declined 11.7 percent during the first 10 months of 1986.

Table A. Percent changes in CPI for All Urban Consumers (CPI-U)

Expenditure category	Seasonally adjusted								Unadjusted
	Changes from preceding month							Compound annual rate 3 months ended October 1986	12 months ended October 1986
	1986

Other goods and services	.4	.2	.3	1.0	.6	-.1	.4	3.7	5.7

Automobile insurance costs continued to rise, advancing 2.2 percent in October and 10.7 percent thus far this year. Used car prices rose slightly for the second consecutive month following 7 months of declines. The index for public transportation was virtually unchanged in October.

The food and beverage component increased 0.3 percent in October. Grocery store food prices rose 0.4 percent, the same as in September. Advances in the indexes for beef, fresh fruits and vegetables, and dairy products accounted for virtually all of the October increase. Beef prices rose 1.5 percent, the same as in September. Among other components of the meats, poultry, fish, and eggs category, pork, poultry, and egg prices, each declined in October. The 0.2-percent drop in pork prices follows a 16.6-percent increase during the preceding 4 months. Poultry and egg prices— down 0.7 and 0.9 percent, respectively—declined for the second consecutive month following large increases in July and August. Fresh fruit and vegetable prices registered their fourth consecutive advance, increasing 1.6 percent in October after declining 6.1 percent during the first 6 months of 1986. The index for dairy products rose 0.6 percent in October, largely due to a 0.8-percent increase in milk prices, their largest in 2 years. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.2 and declined 0.1 percent, respectively.

The index for apparel and upkeep—up 0.2 percent in October—registered its fourth consecutive increase after declining in 5 of the first 6 months of the year. Clothing prices rose 0.2 percent, and charges for apparel services increased 0.4 percent in October.

The medical care component increased 0.6 percent in October to a level 7.7 percent above a year ago. In October, the index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.3 percent. The index for medical care services increased 0.6 percent, with the costs of physicians' services and hospital rooms up 0.5 and 0.6 percent, respectively.

The index for entertainment rose 0.3 percent in October, the same as in September. The other goods and services component turned upward in October, increasing 0.4 percent.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.1 percent in October.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

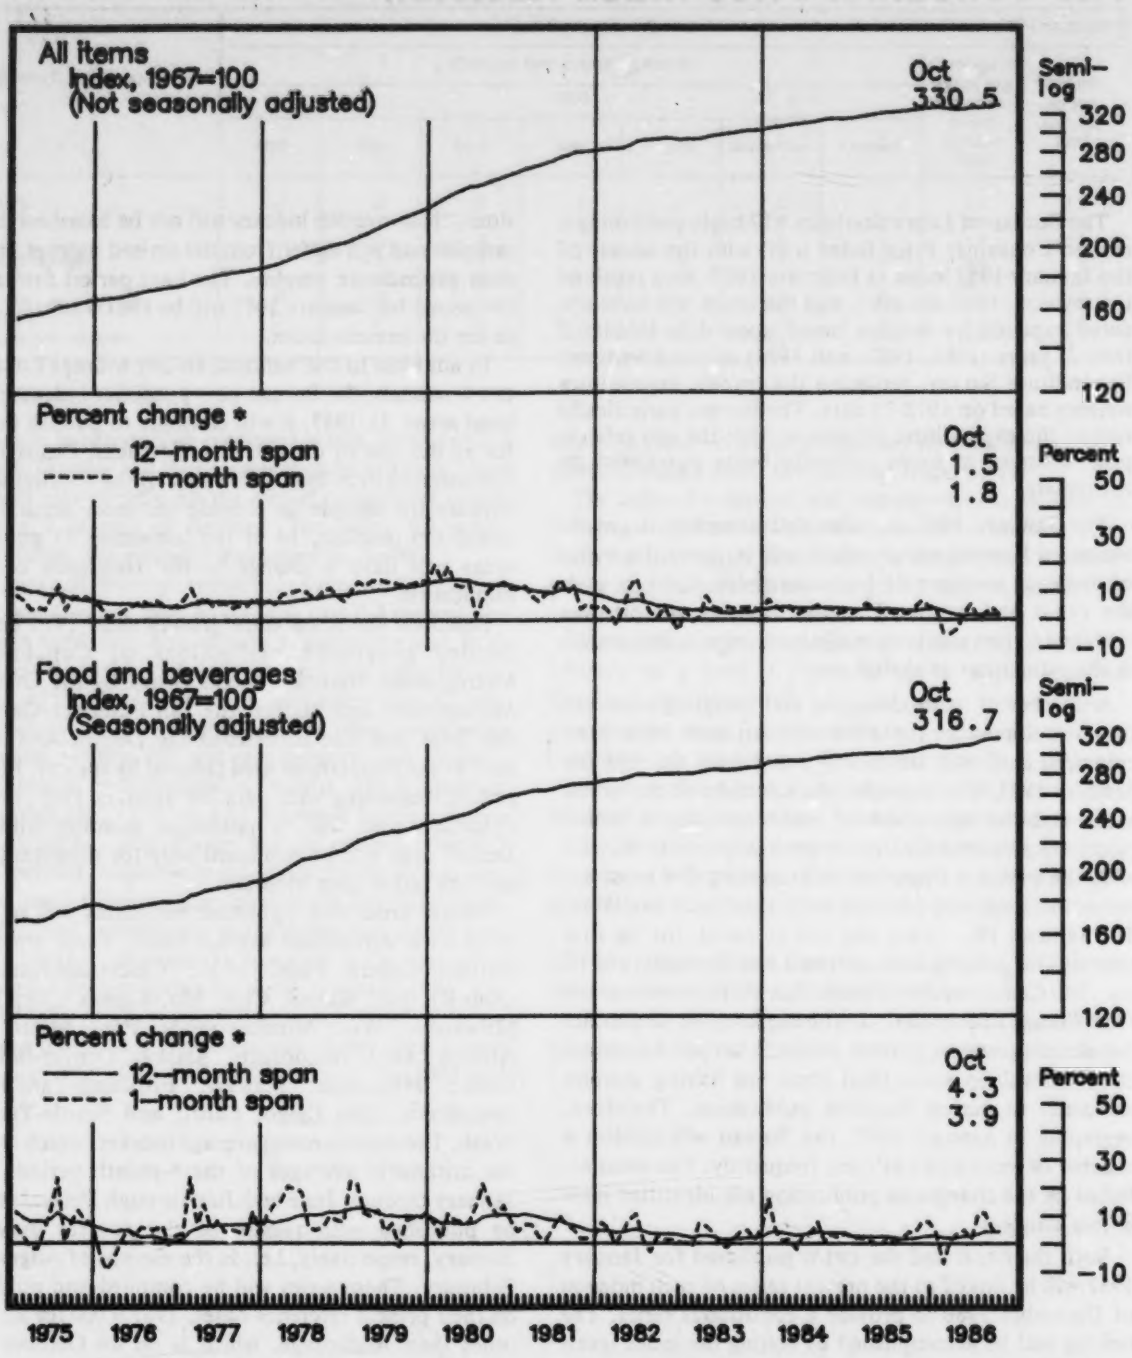
In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

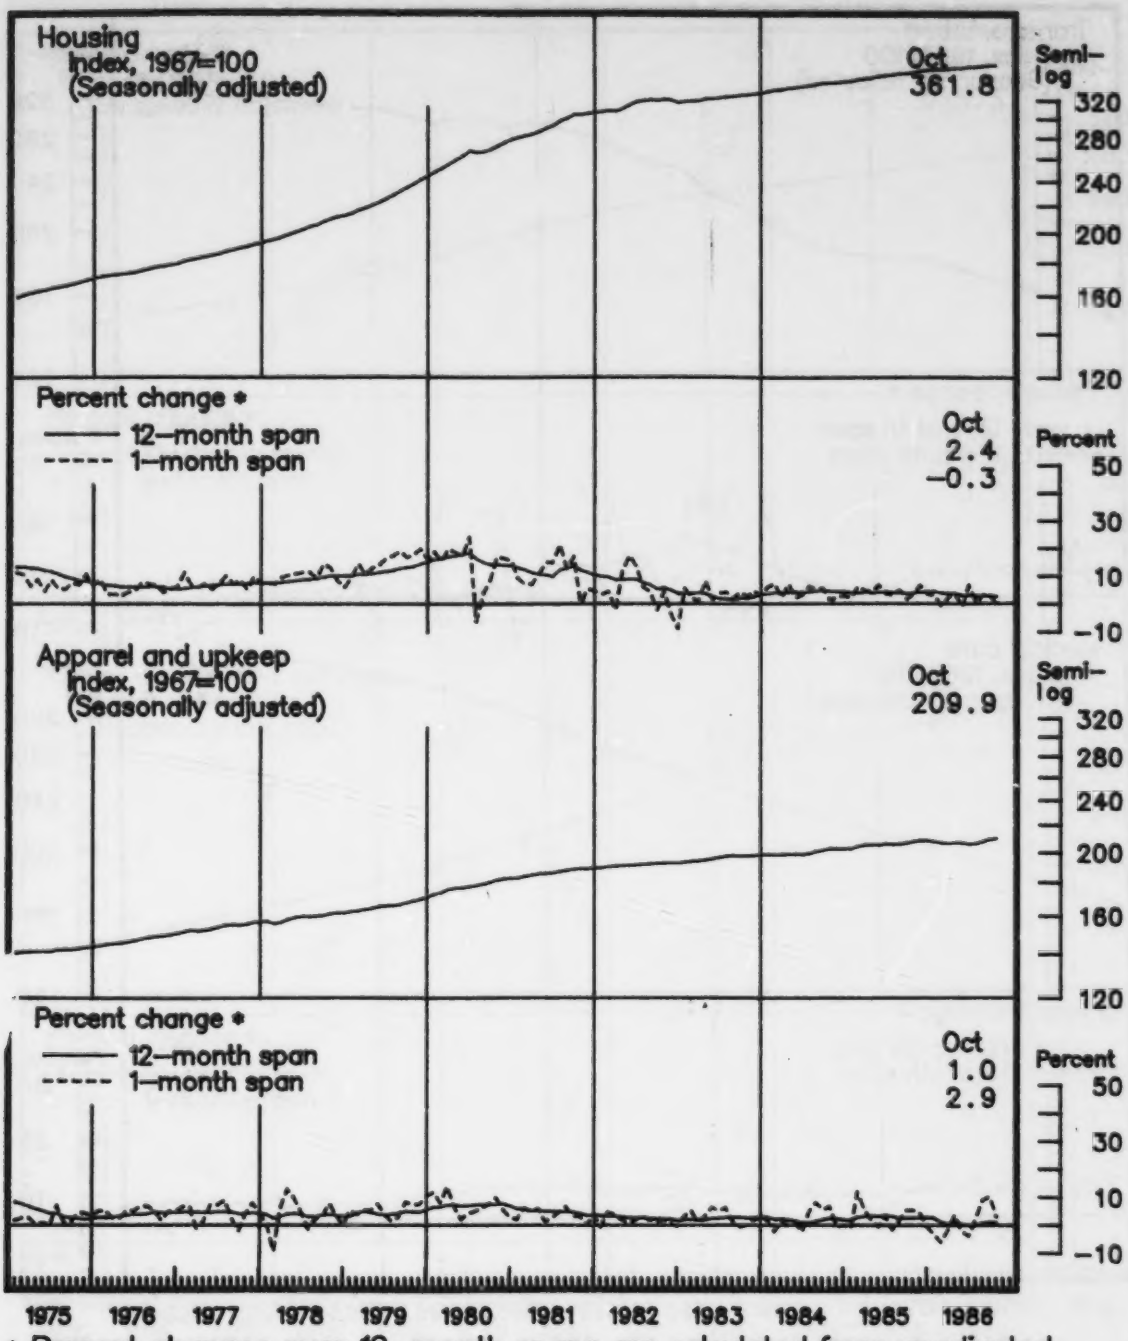
Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

Chart 1: CPI-U: All items, food and beverages, 1975–86



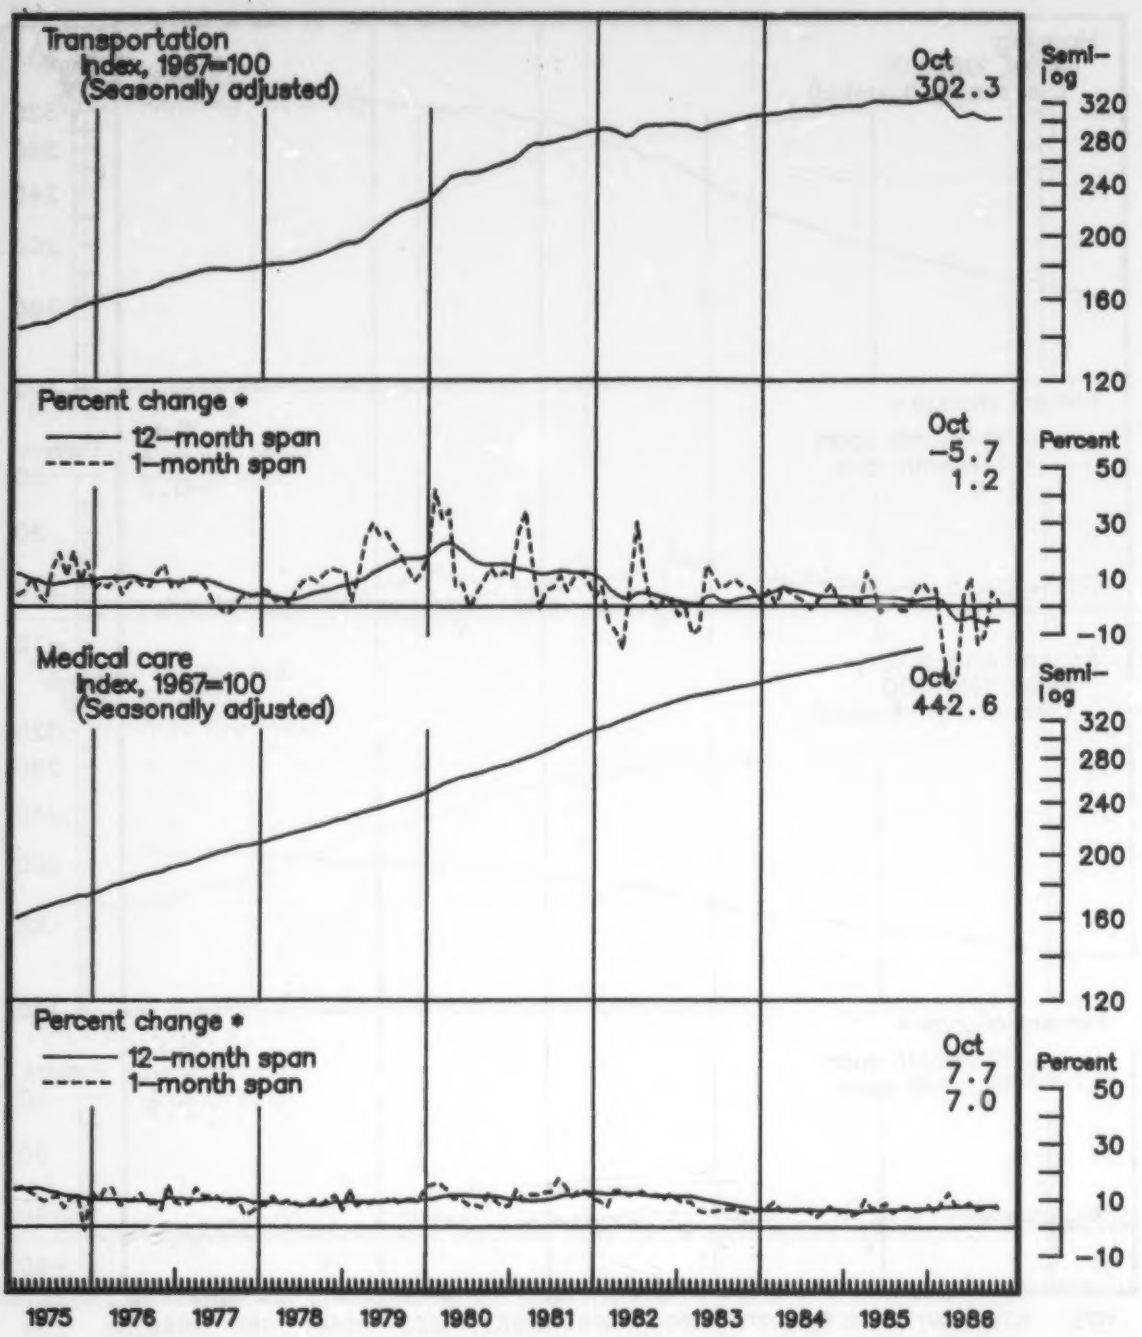
* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 2: CPI-U: Housing, apparel and upkeep, 1975–86



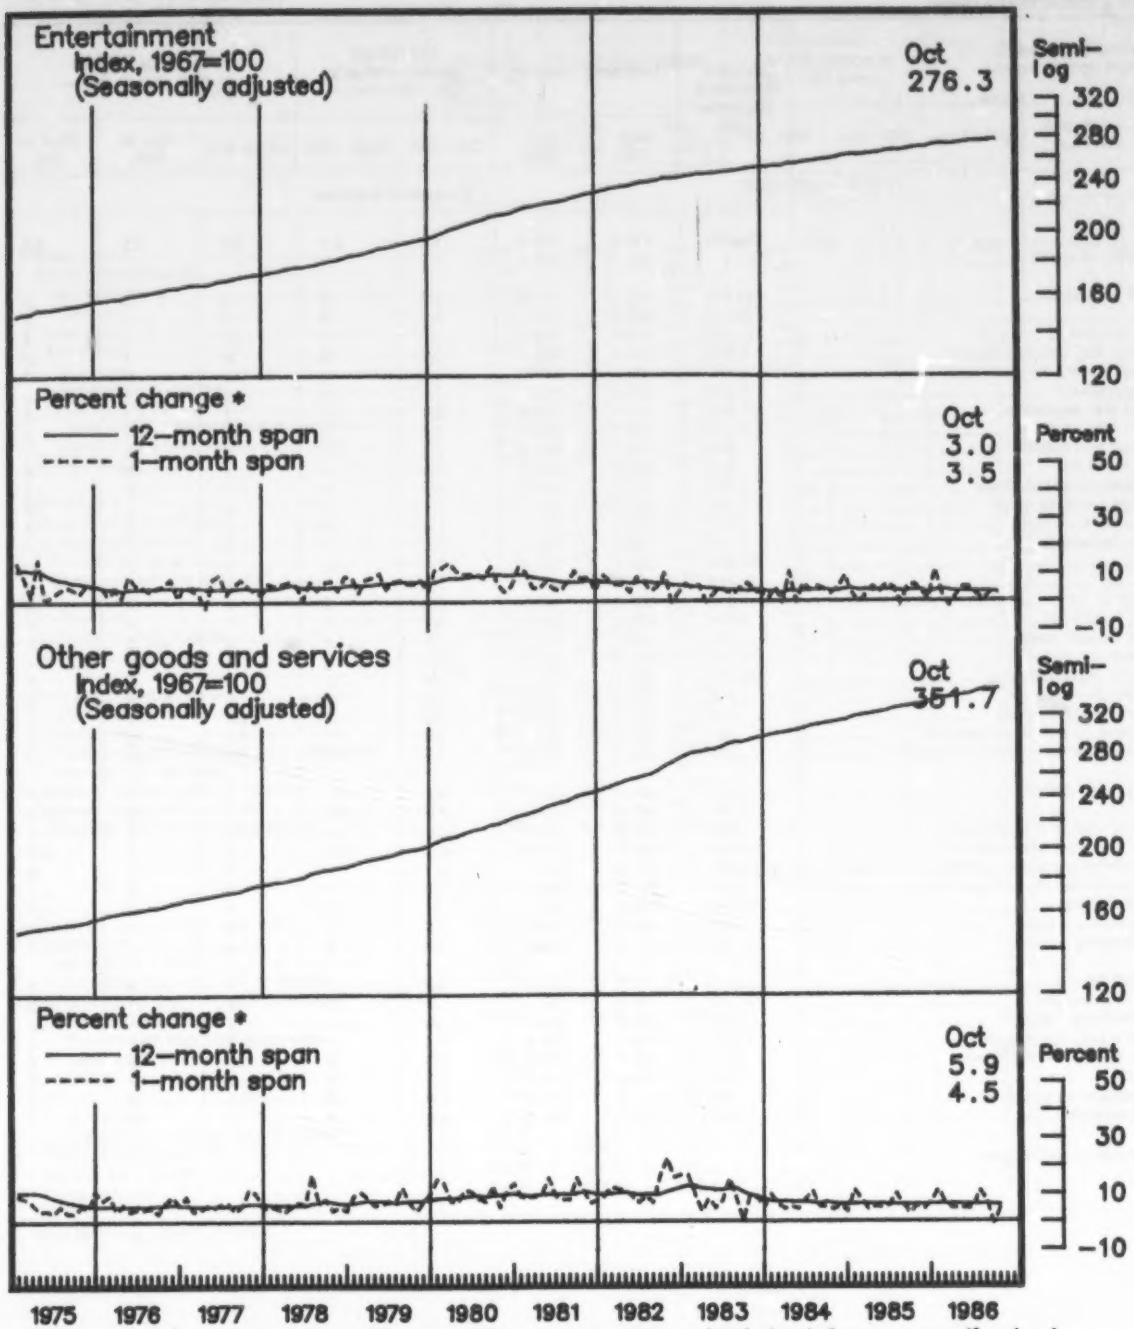
* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 3: CPI-U: Transportation and medical care, 1975–86



* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 4: CPI-U: Entertainment, other goods and services, 1975–86



* Percent changes over 12–month spans are calculated from unadjusted data. Percent changes over 1–month spans are annual rates calculated from seasonally adjusted data.

Selected beef cuts [1]		271.7	273.2	4.1	.6	1.3	.5	.6
Imported food and fishery products [4]	12/77	152.5	153.0	5.9	.3	-.2	-.2	.5

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Selected beef cuts [1]		271.7	273.2	20.6	-13.5	2.3	9.9	2.1	6.0
Imported food and fishery products [4]	12/77	152.8	153.5	8.0	16.1	.3	.3	11.9	.3

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

(1967=100, unless otherwise noted)

Group and item	Other index base	Unadjusted indexes		Unadjusted percent change to Oct. 1986 from—		Seasonally adjusted percent change from—		
		Sept. 1986	Oct. 1986	Oct. 1985	Sept. 1986	July to Aug.	Aug. to Sept.	Sept. to Oct.
Housing		363.7	363.0	2.4	-0.2	0.2	0.2	0.0
Shelter		407.6	409.5	5.2	.5	.3	.5	.4
Renters' costs	12/82	123.6	124.0	5.2	.3	.2	.4	.3

Housekeeping and home maintenance services [1]		393.8	394.5	2.1	.2	.3	.2	.2

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [5]	2	12/77	-	174.9	-	175.3	.5	.2	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 14. Consumer Price Index for All Urban Consumers: Selected areas, food at home expenditure categories

(1967 = 100, unless otherwise noted)

West/D [4]	–1.3	–.9	–1.6	–.3	.4	–2.7

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[NA] Data not adequate for publication.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

Nondurables less food	265.7	.0	262.0	.0	260.8	1.2	244.1	1.1	249.4	.6
Nondurables	305.1	.4	286.5	.0	292.7	1.0	274.5	.0	286.6	.5
Services less rent of shelter [5]	113.6	.9	115.1	–.7	117.7	–.7	117.5	.4	121.7	.7
Services less medical care	380.2	–.3	369.5	–.3	432.6	–.9	414.8	.7	433.1	.9

[1] Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1982=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[9] Indexes on a January 1976=100 base.

[10] Indexes on an August 1981=100 base.

[11] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[12] After December 1986, this index series will be published on a monthly basis.

[13] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

West/D[3]	2	12/77	-	176.3	-	176.7	.4	.2	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D [4]	-1.3	-1.1	-1.6	-.4	.9	-2.7

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

[1] Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1984=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[9] Indexes on a January 1976=100 base.

[10] Indexes on an August 1981=100 base.

[11] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[12] After December 1986, this index series will be published on a monthly basis.

[13] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] Indexes on an August 1981=100 base.

[6] This index series will not be published after December 1986.

Table 24. Consumer Price Index for All Urban Consumers: Population size class,[1] by expenditure category and commodity and service group

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[7] This index series will not be published after December 1986.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] Indexes on an August 1981=100 base.

[6] This index series will not be published after December 1986.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[7] This index series will not be published after December 1986.

Services less rent of shelter [5]	112.0	5.5	1.3	110.9	4.0	.5	110.8	5.9	-.2	106.9	4.9	.8
Services less medical care	209.3	6.1	1.8	202.6	2.7	.6	181.8	4.8	-.1	199.1	3.2	1.0

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[NA] Data not adequate for publication.

Table P-1. Average residential prices for utility (piped) gas, electricity, and fuel oil, U.S. city average and selected areas

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

[6] The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for Oct. 1986		Average price per KWH of electricity		Range of KWH consumption for Oct. 1986	
	Sept. 1986	Oct. 1986	Low	High	Sept. 1986	Oct. 1986	Low	High

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Table P-3. Average prices for gasoline, U.S. city average and selected areas (Per gallon)

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

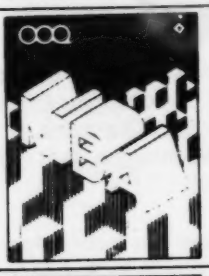
BLS Periodicals

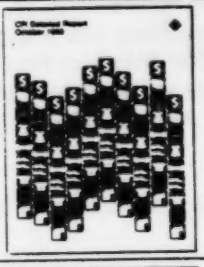
BLS periodicals provide timely information on employment, occupations, wages, and prices.

Monthly Labor Review
the oldest and most authoritative Government research journal in economics and social sciences. Regular features include current labor statistics and developments in industrial relations.
$16 a year

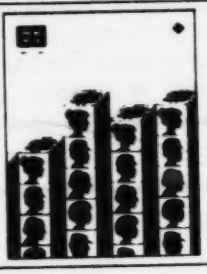
Current Wage Developments
reports monthly on specific wage and benefit changes from collective bargaining agreements. Includes data on strikes or lockouts, major agreements expiring, and compensation changes.
$12 a year



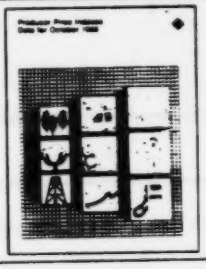
Occupational Outlook Quarterly
helps students and guidance counselors learn about new occupations, training opportunities, salary trends, and career counseling programs. Written in nontechnical language and illustrated in color.
$5 a year



CPI Detailed Report
is the most comprehensive report on monthly consumer price indexes and rates of change.
$16 a year



Employment and Earnings
gives current monthly employment and earnings statistics for the Nation as a whole, for States and for more than 200 areas. Included are household and establishment data seasonally and not seasonally adjusted. Includes annual supplement.
$22 a year



Producer Price Indexes
includes monthly price movements of both farm and industrial commodities, by industry and stage of processing. Includes annual supplement.
$21 a year

BLS Consumer Expenditure Survey
Available on Tape

1984 Diary Survey of Consumer Expenditures

The Bureau of Labor Statistics microdata tapes from the Diary component of the 1984 Consumer Expenditure Survey are now available. The Diary tapes include weekly expenditures on frequently purchased items such as food at home, food away from home, alcoholic beverages, tobacco products and smoking supplies, personal care products and services, nonprescription drugs and supplies, housekeeping supplies, and energy items. Household characteristics and income are also included on the Diary tapes. These data were also published in a June 22, 1986, news release (USDL 86-258).

The 1980-81 and 1982-83 Diary tapes are also available.

In December 1986, BLS will have microdata tapes available containing information on consumer expenditures, income, and characteristics collected in 1984 from the Interview component. The following items will be included on the Interview tape for the first time: Major appliances, automobile information, travel expenditures, and summary level expenditure variables.

For further information concerning these tapes, contact the Division of Consumer Expenditure Surveys, Bureau of Labor Statistics, Rm. 4216, 600 E Street, NW, Washington, D.C. 20212. (Phone: 202-272-5060).

To purchase, complete the form below and return with check (payable to Bureau of Labor Statistics) to Division of Planning and Financial Management, Bureau of Labor Statistics, Rm. 1083, 441 G Street, NW, Washington, D.C. 20212.

Please send me the data tapes indicated below for a total cost of $

The *CPI Detailed Report* is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year $16 domestic, and $20 foreign. Single copy domestic, $6; foreign, $7.50. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC, and at additional mailing offices.

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements November 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.1 percent before seasonal adjustment in November to a level of 330.8 (1967=100). For the 12-month period ended in November, the CPI-U has increased 1.3 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also rose 0.1 percent in November, prior to seasonal adjustment. The November 1986 CPI-W level of 325.4 (1967=100) was 0.9 percent higher than the index in November 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0.3 percent in November, following a 0.2-percent increase in October. The energy index continued to decline in November, but by substantially less than in the preceding month (0.7 percent compared with 2.2 percent). Food prices rose 0.5 percent in November, compared with 0.3 percent in October. Partially offsetting those movements was a smaller advance in shelter costs—up 0.2 percent following a 0.4-percent increase in October. For items other than food, shelter, and energy, prices on average advanced 0.3 percent. About 40 percent of this rise was due to increases in new car prices and financing charges.

During the first 11 months of 1986, the CPI-U advanced at an annual rate of 0.9 percent. This compares with a 3.8-percent increase in the year ended in December 1985.

The transportation component, which rose 0.1 percent in October, advanced 0.5 percent in November. Gasoline prices declined substantially less in November than in October (0.6 percent compared with 2.4 percent). During the first 11 months, these prices have declined 31.2 percent and, as of November, were 39.1 percent below their peak level of March 1981. New car prices increased 0.9 percent in November following an 0.8-percent rise in October. Automobile financing charges—up 4.9 percent—rose sharply for the second consecutive month. (This increase largely reflects the elimination of manufacturer financing concessions on 1986 models.) Nevertheless, financing charges have declined 7.3 percent during the first 11 months of 1986. Automobile insurance costs continued to rise, increasing 0.8 percent in November and 11.6 percent thus far this year. Used car prices turned down again in November, after registering small increases in the preceding 2 months, and are 4.3 percent below their level at the end of 1985. The index for public transportation rose 0.7 percent in November as a 1.4-percent increase in airline fares more than offset small declines in intercity bus and train fares.

The housing component, which was virtually unchanged in October, decreased 0.1 percent in November, as declines in the indexes for fuel and other utilities and household furnishings and operations more than offset a small increase in shelter costs. Charges for natural gas dropped 3.2 percent, largely reflecting a shift to winter baseline rates in California. Fuel oil prices continued to drop, declining 1.3 percent in November and 34.1 percent so far this year. Despite registering a 1.1-percent increase in November, the index for electricity, like those for fuel oil and utility gas, was lower in November than at the end of 1985. Among other utilities,

charges for local telephone services declined 1.7 percent. Shelter costs rose 0.2 percent in November, following a 0.4-percent increase in October. Within shelter, renters' costs rose 0.4 percent; homeowners' costs, 0.1 percent; and maintenance and repair costs declined 0.5 percent.

The food and beverage index rose 0.5 percent in November, following a 0.3-percent increase in October. Grocery store food prices also rose 0.5 percent in November. Increases in the indexes for meats, poultry, fish, and eggs and for fruits and vegetables accounted for about four-fifths of the grocery store food rise. Prices for beef and veal—up 1.2 percent in November—have risen 8.1 percent in the last 6 months following declines in each of the first 5 months of 1986. The indexes for both pork and eggs turned up in November. Partially offsetting these increases were declines in the prices for poultry and fish and seafood. The index for fruits and vegetables rose 1.5 percent after seasonal adjustment. Smaller than usual seasonal declines in prices for citrus fruits, coupled with increases in prices for tomatoes and potatoes, largely accounted for the advance. Prices for dairy products—up 0.5 percent in November—recorded their second significant increase after advancing only 0.6 percent in the entire first 9 months of 1986. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.5 and 0.4 percent, respectively.

The index for apparel and upkeep—up 0.2 percent in November—registered its fifth consecutive increase after declining in 5 of the first 6 months of the year. Clothing prices rose 0.3 percent, following seasonal adjustment, and charges for apparel services increased 0.2 percent in November.

The medical care component increased 0.4 percent in November to a level 7.7 percent above a year ago. In November, the index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.3 percent. The index for medical care services increased 0.4 percent, with the costs of physicians' services and hospital rooms up 0.9 and 0.8 percent, respectively.

The indexes for entertainment and other goods and services rose 0.4 and 0.3 percent, respectively, about the same as in October.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.2 percent in November.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this article.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and expanded geographic definitions of Consolidated Metropolitan Statistical Areas issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area covered by the CPI. For this reason, beginning with data for January 1987, the San Francisco area will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly.

Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1987 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 4. Consumer Price Index for All Urban Consumers: Food expenditure categories, seasonally adjusted, U.S. city average —Continued

(1967=100, unless otherwise noted)

Group and item	Other index base	Seasonally adjusted indexes		Seasonally adjusted annual rate percent change for—					
				3 months ending in—				6 months ending in—	
		Oct. 1986	Nov. 1986	Feb. 1986	May 1986	Aug. 1986	Nov. 1986	May 1986	Nov. 1986
Food away from home		364.4	366.2	2.4	5.3	3.8	5.0	3.8	4.4
Lunch	12/77	175.8	176.7	2.6	4.8	3.8	5.1	3.7	4.4
Dinner	12/77	175.3	176.1	2.4	3.8	3.3	4.9	3.1	4.1
Other meals and snacks	12/77	180.8	182.2	3.0	6.3	6.5	5.2	4.7	5.8
Alcoholic beverages		240.1	241.0	2.7	1.0	1.7	1.8	1.9	1.8
Alcoholic beverages at home	12/77	151.8	152.7	2.1	.8	.5	1.6	1.5	1.1
Beer and ale		241.0	242.5	1.5	1.0	1.2	3.4	1.3	2.3
Wine [1]		241.0	239.4	6.6	.0	2.2	-3.8	3.2	-.8
Distilled spirits [1,2]	12/77	141.9	142.0	1.4	.3	-.8	1.1	.9	.1
Other alcoholic beverages [1,3]	12/77	139.8	139.7	.9	.9	-1.1	2.6	.9	.7
Whiskey [1,3]		170.1	170.3	1.9	-.2	-.5	.2	.8	-.1
Alcoholic beverages away from home	12/77	176.9	176.9	5.5	2.8	6.1	1.8	4.2	4.0
Special indexes:									
Domestically produced farm food		296.0	297.2	-5.9	4.5	11.9	6.9	-.8	9.4
Selected beef cuts [1]		273.2	276.6	1.6	-10.3	9.7	9.7	-4.5	9.7
Imported food and fishery products [4]	12/77	153.5	153.6	18.8	4.0	-.5	1.3	11.2	.4

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

(1967=100, unless otherwise noted)

Group and item	Other index base	Unadjusted indexes		Unadjusted percent change to Nov. 1986 from—		Seasonally adjusted percent change from—		
		Oct. 1986	Nov. 1986	Nov. 1985	Oct. 1986	Aug. to Sept.	Sept. to Oct.	Oct. to Nov.

Housekeeping and home maintenance services [1]		394.5	394.0	1.7	-.1	.2	.2	-.1

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [9]	2	12/77	174.9	-	175.3	-	-	-	-	.5	.2	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.
After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D [4]	-.5	-.4	-.6	-.1	-3.3	1.2

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

[1] Areas on pricing schedule 2 (See footnote 1 table 13) will appear next month.

[2] Indexes on a October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes are on a November 1977=100 base unless otherwise indicated.

[5] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[6] Indexes on a November 1982=100 base.

[7] Index on a June 1978=100 base in Miami, Fla.

[8] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[9] Indexes on a June 1978=100 base.

[10] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[11] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[12] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[13] Indexes on an August 1981=100 base.

[14] Indexes are on the bases listed below:

Anchorage, Alaska.....January 1978=100.
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania...November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif.....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[15] Data for Northeast, Pa. will no longer be published after December 1986.

[16] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[17] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[18] Index on a June 1978=100 base in San Diego, Calif.

[19] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[20] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base' in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

West/D [9]	2	12/77	176.3	-	176.7	-	-	-	-	.4	.2	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Areas on pricing schedule 2 (See footnote 1 table 18) will appear next month.

[2] Indexes on an October 1967=100 base unless otherwise indicated.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[4] Indexes on a November 1977=100 base unless otherwise indicated.

[5] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=100 base.

[6] Indexes on a November 1984=100 base.

[7] Index on a June 1978=100 base in Miami, Fla.

[8] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind.; Denver-Boulder, Col.; and Miami, Fla.

[9] Indexes on a June 1978=100 base.

[10] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[11] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[12] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[13] Indexes on an August 1981=100 base.

[14] Indexes are on the bases listed :

Anchorage, Alaska.....January 1978=100.
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November 1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania...November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif.....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[15] Data fer Northeast, Pa. will no longer be published after December 1986.

[16] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[17] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[18] Index on a June 1978=100 base in San Diego, Calif.

[19] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[20] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[NA] Data not adequate for publication.

Table P-1. Average residential prices for utility (piped) gas, electricity, and fuel oil, U.S. city average and selected areas

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which h urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size clas A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for Nov. 1986		Average price per KWH of electricity		Range of KWH consumption for Nov. 1986

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2. April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

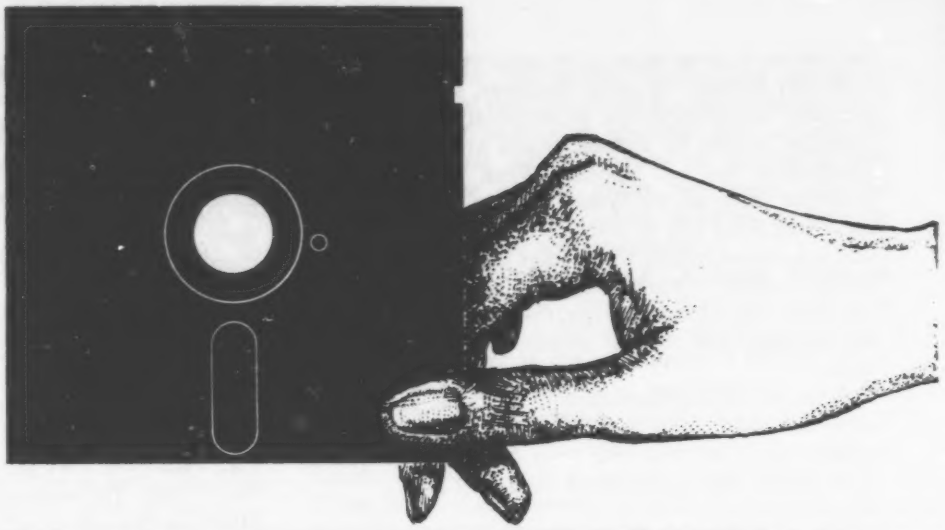
Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

BLS Data Diskettes now available



BLS data users now can store and manipulate the Bureau's data series on their personal, IBM-compatible microcomputers. The following data diskettes are formatted for use with LOTUS 1-2-3:

Monthly

Consumer Price Index—104 items in the U.S. City Average Index and 54 areas in the All-Items Index for the current year to date and the previous year. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Employment, hours, and earnings from the establishment survey—national monthly and annual average data for 249 industrial series for the current year to date and the 3 prior years. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Labor force, employment, and unemployment from the Current Population Survey—monthly and annual average information on the employment and unemployment experience of the Nation's population classified by age, sex, and race for 282 series for the current year to date and the 3 prior years. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Producer Price Indexes—selected commodity groupings of 225 series by stage of processing for the most recent 13 months. Single diskette, $35. Annual subscription of 12 monthly diskettes, $288.

Quarterly

Employment Cost Index—quarterly measures of change in total compensation (wages, salaries, and employer costs for employee benefits) and in wages and salaries only; 180 series beginning in 1980–81 and 120 series from 1975 to the most recent quarter. Single diskette, $35. Annual subscription of 4 quarterly diskettes, $104.

National productivity indexes—63 quarterly labor productivity and cost measures for business, nonfarm business, nonfinancial corporations, and manufacturing from 1947 to the most recent quarter. Also, 24 annual multifactor productivity measures (output per unit of combined labor and capital inputs) for private business, private nonfarm business, and manufacturing from 1948 to the most recent year. Single diskette, $35. Annual subscription of 8 quarterly diskettes, $196.

U.S. export and import price indexes—quarterly export and import price indexes for 450 Standard Industrial Trade Classification categories for the most recent 8 quarters. Single diskette, $35. Annual subscription of 4 quarterly diskettes, $104.

Annual

Economic projections to 1995—average annual output, total employment, hours, and wage and salary employment for 1984 and projected 1985–95 for 150 industries. Single diskette, $35.

Foreign labor statistics—129 annual indexes of manufacturing productivity and labor costs for the United States and 11 foreign countries from 1950 to 1985, and levels of the labor force, unemployment, and related measures for the United States and 9 countries from 1959 to 1985. Single diskette, $35. Annual subscription of 4 diskettes, $104.

Industry productivity data—annual indexes showing change over time in output of an industry, the employee hours expended on the output, and output per employee hour for over 130 industries. Most start in 1958 and go to the most recent year. Also, annual Federal Government productivity indexes showing the change over time in the output of 28 functions, the employee years expended on that output, and output per employee year from 1967 to the most recent fiscal year. Single diskette, $35

Occupational injury and illness data—annual number of work-related injuries and illnesses or lost workdays per 100 full-time employees from 1981 to 1984. Single diskette, $35.

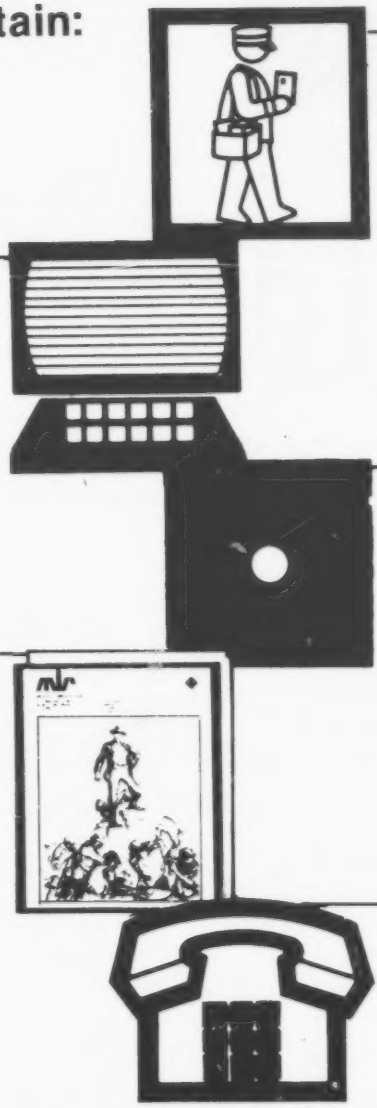
BLS International Price Data

Quarterly measures of price change for U.S. imports and exports under various classifications, useful for different types of analysis:

- SITC, a United Nations classification for international comparisons;
- SIC-based, used for industry comparisons;
- End use, for use with National Accounts data.

How to obtain:



Mailing List:

To obtain the quarterly news release, ask to be put on a mailing list. Call Bureau of Labor Statistics, Division of International Prices (202) 272-5020.

Electronic News Release:

Quickest. Accessible electronically immediately at release time through BLS news release service. Write to the Office of Publications, Bureau of Labor Statistics, Washington D.C. 20212, or call (202) 523-1913.

Data Diskettes:

Quarterly import and export price indexes are available on diskettes for the most recent eight quarters. For information, call the Office of Publications, Bureau of Labor Statistics (202) 523-1090.

Monthly Labor Review:

Articles twice a year provide in-depth analyses of import and export price movements and developments in U.S. trade. Subscription available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, for $16 a year; $4.75 single copy.

Telephone:

For comparisons of United States, German, and Japanese export price indexes at the detailed product level, call Division of International Prices (202) 272-5027.

U.S. GOVERNMENT PRINTING OFFICE:1987-181-498/60202

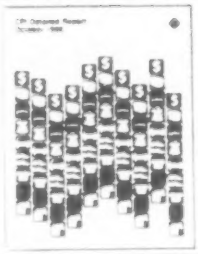
BLS Periodicals

BLS periodicals provide timely information on employment, occupations, wages, and prices.

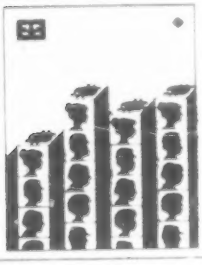
Monthly Labor Review
the oldest and most authoritative Government research journal in economics and social sciences. Regular features include current labor statistics and developments in industrial relations.
$16 a year

Current Wage Developments
reports monthly on specific wage and benefit changes from collective bargaining agreements. Includes data on strikes or lockouts, major agreements expiring, and compensation changes.
$12 a year

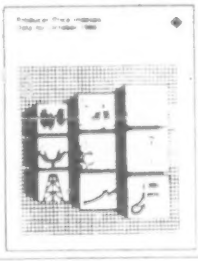
Occupational Outlook Quarterly
helps students and guidance counselors learn about new occupations, training opportunities, salary trends, and career counseling programs. Written in nontechnical language and illustrated in color.
$5 a year



CPI Detailed Report
is the most comprehensive report on monthly consumer price indexes and rates of change.
$16 a year



Employment and Earnings
gives current monthly employment and earnings statistics for the Nation as a whole, for States and for more than 200 areas. Included are household and establishment data (seasonally and not seasonally adjusted). Includes annual supplement.
$22 a year



Producer Price Indexes
includes monthly price movements of both farm and industrial commodities, by industry and stage of processing. Includes annual supplement.
$21 a year

The *CPI Detailed Report* is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year $16 domestic, and $20 foreign. Single copy domestic, $6; foreign, $7.50. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $145 in contiguous U.S. and Hawaii; $160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC, and at additional mailing offices.

NOTE: Beginning next month with release of the Consumer Price Index (CPI) for January 1987, the Bureau of Labor Statistics will introduce revised versions of the current CPI's both for all Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect updated patterns of consumer spending and will incorporate a number of technical improvements. Additional technical improvements are scheduled for introduction over the next 2 years. See page 4 for further details.

Price Movements December 1986

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.1 percent before seasonal adjustment in December to a level of 331.1 (1967=100). For the 12-month period ended in December, the CPI-U has increased 1.1 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also rose 0.1 percent in December, prior to seasonal adjustment. The December 1986 CPI-W level of 325.7 (1967=100) was 0.7 percent higher than the index in December 1985.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in December, about the same as in other recent months. In December, prices for food and most automotive expenses, other than gasoline, rose less than in the previous month. This moderation was essentially offset by a turnaround in prices for energy and household furnishings and operations and a larger increase in the index for medical care.

For the 12-month period ended in December 1986, the CPI-U advanced 1.1 percent (over-the-year percent changes are not seasonally adjusted). This compares with increases of about 4 percent in each of the preceding 4 years and was the smallest annual change since a 0.7-percent rise in 1961. The sharp drop in energy prices—down 19.7 percent—was almost entirely responsible for the deceleration in the overall index in 1986. Excluding energy, the CPI-U increased 3.8 percent during the past 12 months, compared with increases of between 4 and 4.5 percent in each of the prior 4 years.

The food index advanced 3.8 percent in 1986, largely reflecting an upturn in meat and poultry prices. Shelter costs, however, rose somewhat less in 1986 than in recent years, increasing 4.6 percent. The index for all items excluding food, shelter, and energy continued to slow. Within this group, however, price movements for commodities and services continued to be different. Charges for these other services remained in the 5-to 6-percent range, while other goods prices rose only 1.4 percent in 1986. The rates for these groups during the past 5 years are shown below.

Percent changes
12 months ended December

	1982	*1983*	*1984*	*1985*	*1986*
All items	3.9	3.8	4.0	3.8	1.1
Energy	1.3	-.5	.2	1.8	-19.7
Energy commodities	-5.0	-3.2	-1.9	3.4	-30.5
Energy services	14.1	4.1	3.4	-0.5	-3.3
All items less energy	4.2	4.4	4.5	4.0	3.8
Food	3.1	2.6	3.8	2.7	3.8
Shelter	2.4	4.7	5.2	6.0	4.6
All items less food, shelter, and energy	6.1	5.0	4.4	3.7	3.4
Other commodities	5.5	5.0	3.1	2.2	1.4
Other services	7.3	4.9	6.0	5.4	5.6

The housing component rose 0.3 percent in December, after declining slightly in November, reflecting a turnaround in the indexes for both fuels and household furnishings and operations. Among fuels, prices for fuel oil and natural gas turned upward—1.1 and 0.1 percent, respectively—more

than offsetting a 0.2-percent decline in charges for electricity. All three major household fuel components, however, registered declines during the 12-month period ended in December. Fuel oil prices dropped 33.4 percent in 1986 and were 40.4 percent below their peak level of April 1981. Charges for natural gas and electricity declined 5.8 and 1.5 percent, respectively, during the past 12 months. Among other utilities, charges for local telephone services declined 0.6-percent last month but rose 7.1 percent during the 12 months ended in December. Charges for interstate toll calls however, declined 9.5 percent, while charges for intrastate toll calls rose 0.4 percent in 1986. The 0.6-percent increase in the index for household furnishings and operations followed declines in each of the 2 preceding months and was the largest monthly rise since February 1985. Shelter costs rose 0.2 percent in December, the same as in November, and advanced 4.6 percent during all of 1986.

The transportation component rose 0.3 percent in December, following an increase of 0.5 percent in November. An upward turn in gasoline prices was more than offset by smaller increases, or larger declines, for most other private transportation expenses in December. Despite a 0.7-percent rise last month, gasoline prices were 30.7 percent lower in December than a year ago and were 38.7 percent below their peak level of March 1981. New car prices rose 0.6 percent in December, following increases of 0.8 and 0.9 percent in October and November, respectively. The 5.8-percent advance in new car prices during 1986 was the largest calendar year increase since a 6.8-percent rise in 1981. Automobile finance charges rose slightly in December, but by substantially less than in the preceding 2 months. Despite an 8.5-percent increase in the fourth quarter, automobile finance charges declined 7.3 percent in 1986. Used car prices also declined—down 0.8 percent in December and 5.1 percent in the past 12 months. Automobile insurance costs continued to increase, but by markedly less than during most of 1986—up 0.1 percent in December and 11.8 percent in the past 12 months. The index for public transportation advanced 1.3 percent in December, principally due to a 2.6-percent increase in airline fares. Public transportation costs rose 6.0 percent in 1986.

The food and beverage index rose 0.2 percent in December, following a 0.5-percent increase in November. Grocery store food prices were unchanged in December. Declines in the indexes for meats, poultry, fish, and eggs and for other foods at home offset small increases in the other grocery store food groups. Prices for beef, pork, poultry, and eggs each declined in December, but increased during the year. Pork prices, which were unchanged in 1985, rose 15.5 percent. Poultry prices also advanced substantially in1986, increasing 9.8 percent. In contrast, egg and beef prices rose only slightly in 1986—up 1.0 and 0.6 percent, respectively. The December decline in the other food at home component was largely due to a drop in prices for nonalcoholic beverages. Among other major grocery store food groups, fruit and vegetable prices increased 0.1 percent in December to a level 1.4 percent above a year ago. Fresh fruit and vegetable prices, however, advanced 3.5 percent in the past 12 months, while prices for processed fruit and vegetables declined 1.1 percent. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—each rose 0.4 percent in December.

The medical care component rose 0.7 percent in December to a level 7.7 percent above a year ago. In December, the index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 1.1 percent. The index for medical care services increased 0.7 percent, with the cost of physicians' services and hospital rooms up 0.7 and 1.1 percent, respectively. Physicians' services rose 7.8 percent in 1986 and charges for hospital rooms, 7.7 percent.

The index for apparel and upkeep was unchanged in December, after registering increases in each of the preceding 5 months. Price declines for clothing items, reflecting widespread seasonal sales, were offset by a moderate increase in charges for apparel services. Despite advancing at a 4.4-percent annual rate in the second half of 1986, the index for apparel rose only 0.9 percent in all of 1986. Clothing prices advanced 0.4 percent and charges for apparel services increased 3.9 percent.

The index for entertainment rose 0.3 percent in December, about the same as in recent months. For the 12 months end-

d in December, entertainment costs increased 3.4 percent. Charges for entertainment services rose 5.4 percent and rices for entertainment commodities, 1.9 percent.

The other goods and services component rose 0.3 percent n December to a level 5.6 percent above a year ago. Increases in the indexes for tobacco and tuition and other school ees—up 6.0 and 7.9 percent, respectively—accounted for about two-thirds of the annual increase.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.2 percent in December.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983 and 1984) of the Consumer Expenditure Surveys, replacing the current expenditure weights based on 1972–1973 data. The Bureau periodically revises the expenditure weights so that the CPI reflects price changes of items currently being purchased by consumers.

The January 1987 CPI will also introduce a greatly enhanced housing survey which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The selection of the new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision have also been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The CPI revision was begun as a 5-year project in 1984. In addition to the new expenditure weights and enhancements that will be introduced with the January 1987 CPI, other technical improvements will be introduced over the next 2 years.

The January 1987 index will also be based for the first time on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample so as to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified later in this announcement.

Both the CPI-U and the CPI-W published for January 1987 will be linked to each index's present series as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for revised CPI issued for January 1987 will be 1967=100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas — Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 14 of the remaining 27 published areas will have a change in the frequency of their publication.

Based on the population growth since 1970 and the expanded geography from use of the Consolidated Metropolitan Statistical Area definitions as issued by the Office of Management and Budget, the San Francisco-Oakland-San Jose area has superseded the Detroit-Ann Arbor area as the fifth largest area in the U.S. covered by the CPI indexes. For that reason, the San Francisco area, beginning with data for January 1987, will be published monthly while the Detroit area will be published only for even-numbered months rather than monthly as currently.

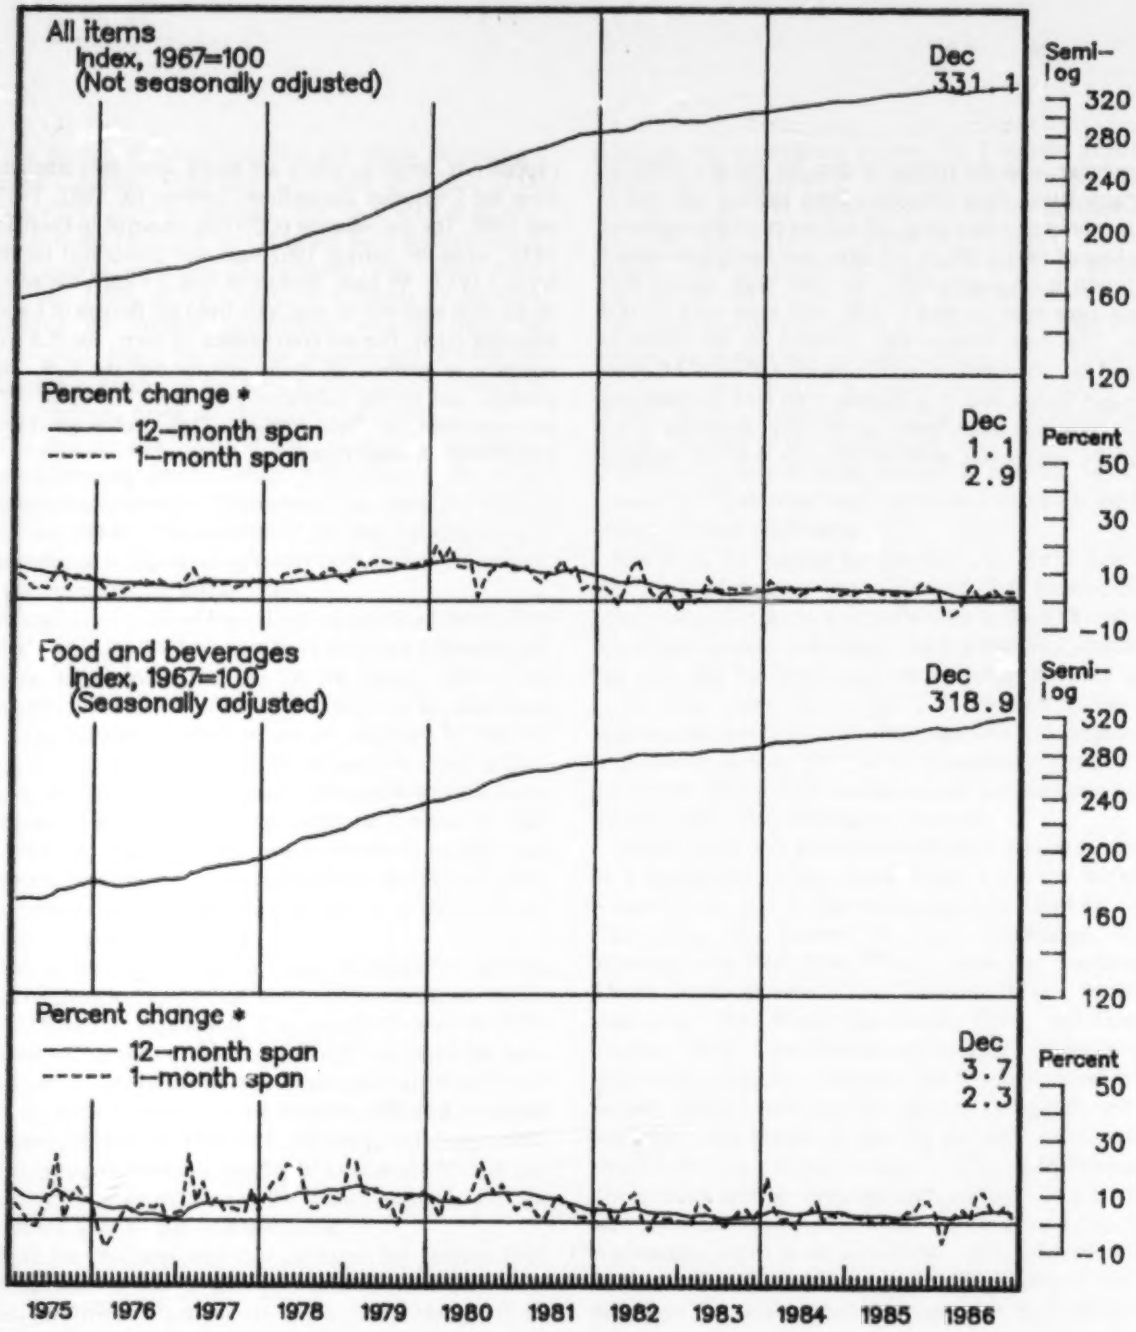
Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967=100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

CPI's Will Shift to New Reference Base in 1988

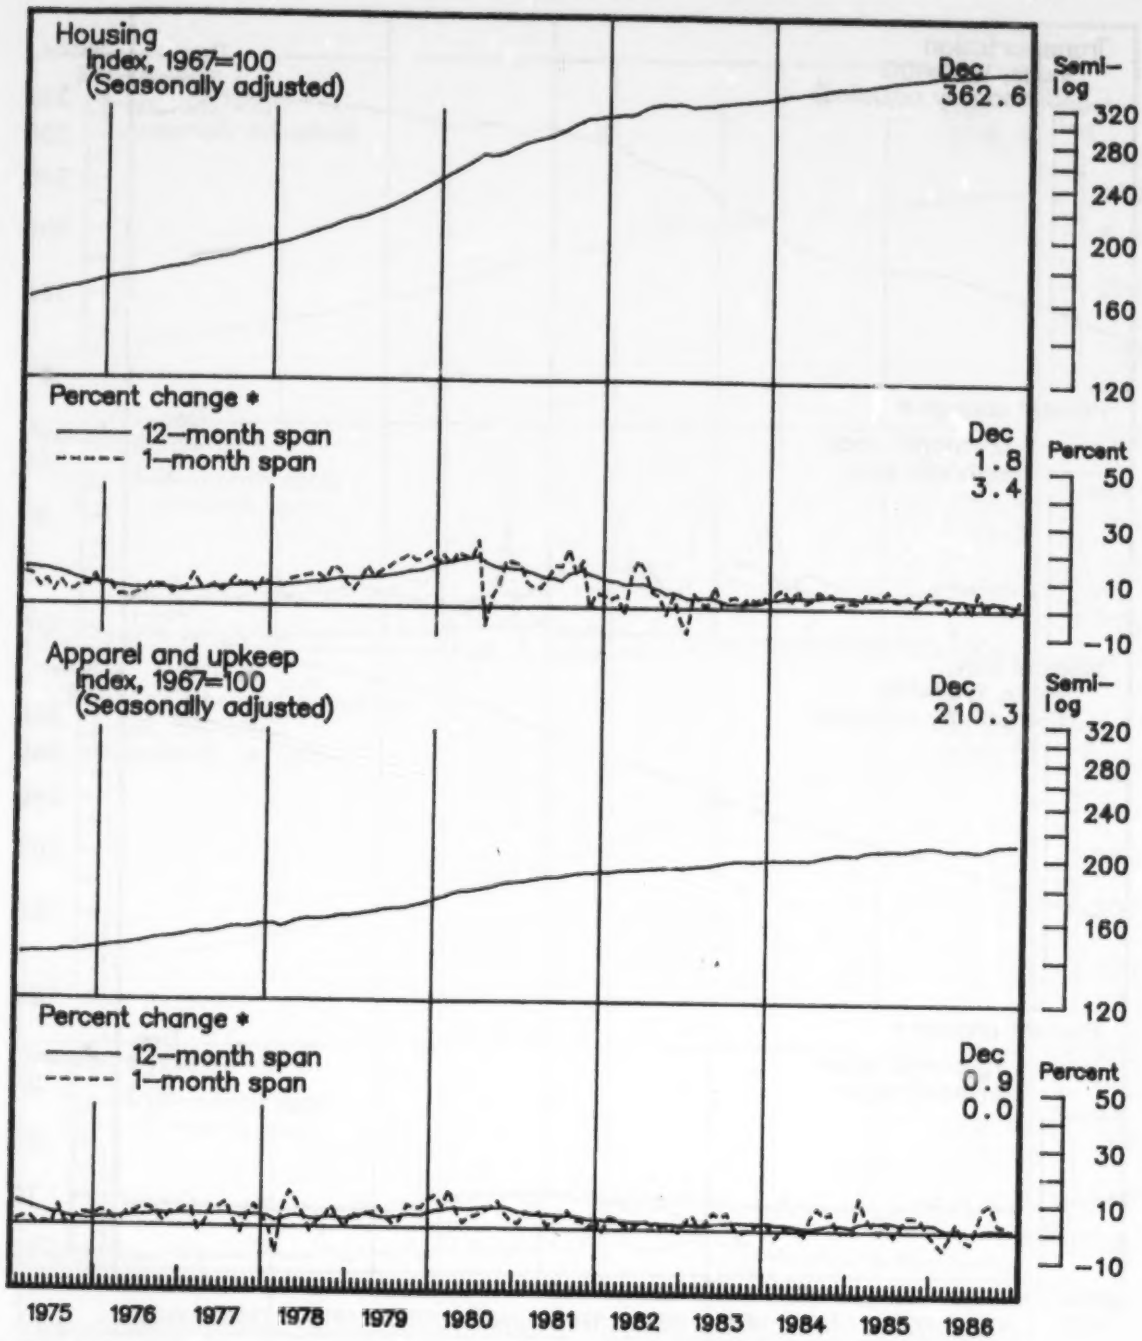
Beginning with the release of data for January 1988 (in February 1988), most Consumer Price Indexes will shift to to a new reference base year. All indexes currently expressed on a base of 1967=100, or any other base through December 1981, will be rebased to 1982−84=100. Only indexes with a base later than December 1981 will keep their current bases. This base change was reviewed by the Office of Federal Statistical Policy and Standards, Office of Management and Budget and is in keeping with their longstanding policy to update index bases periodically. Selection of the 1982−84 period was made to coincide with the updated expenditure weights, which are based upon data tabulated from the Consumer Expenditure Surveys for 1982, 1983, and 1984. The last rebasing of CPI data occurred in February 1971, when the current 1967 base was substituted for the former 1957−59 base. Historical data for each CPI series on the new base will be available from the Bureau of Labor Statistics (BLS). For the convenience of users, the BLS will continue to publish all items indexes for the U.S. city average, and for the individual local areas for which CPI's are published on their former official reference bases (1967=100 in most cases).

Chart 1: CPI-U: All items, food and beverages, 1975–86



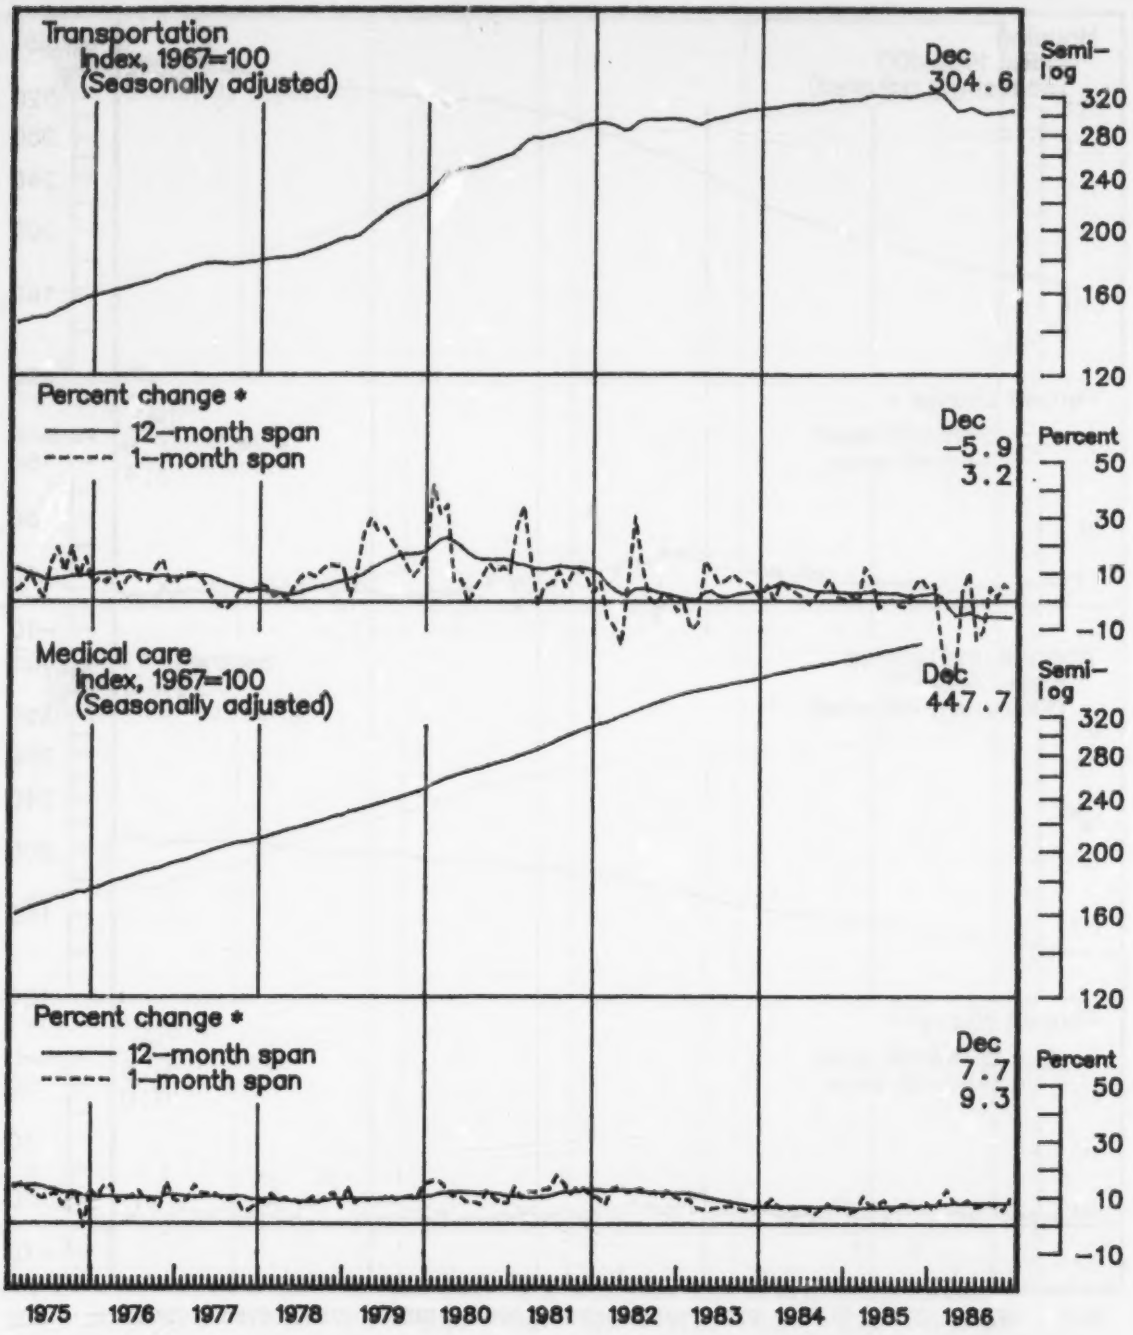
* Percent changes over 12–month spans are calculated from unadjusted data. Percent changes over 1–month spans are annual rates calculated from seasonally adjusted data.

Chart 2: CPI-U: Housing, apparel and upkeep, 1975–86



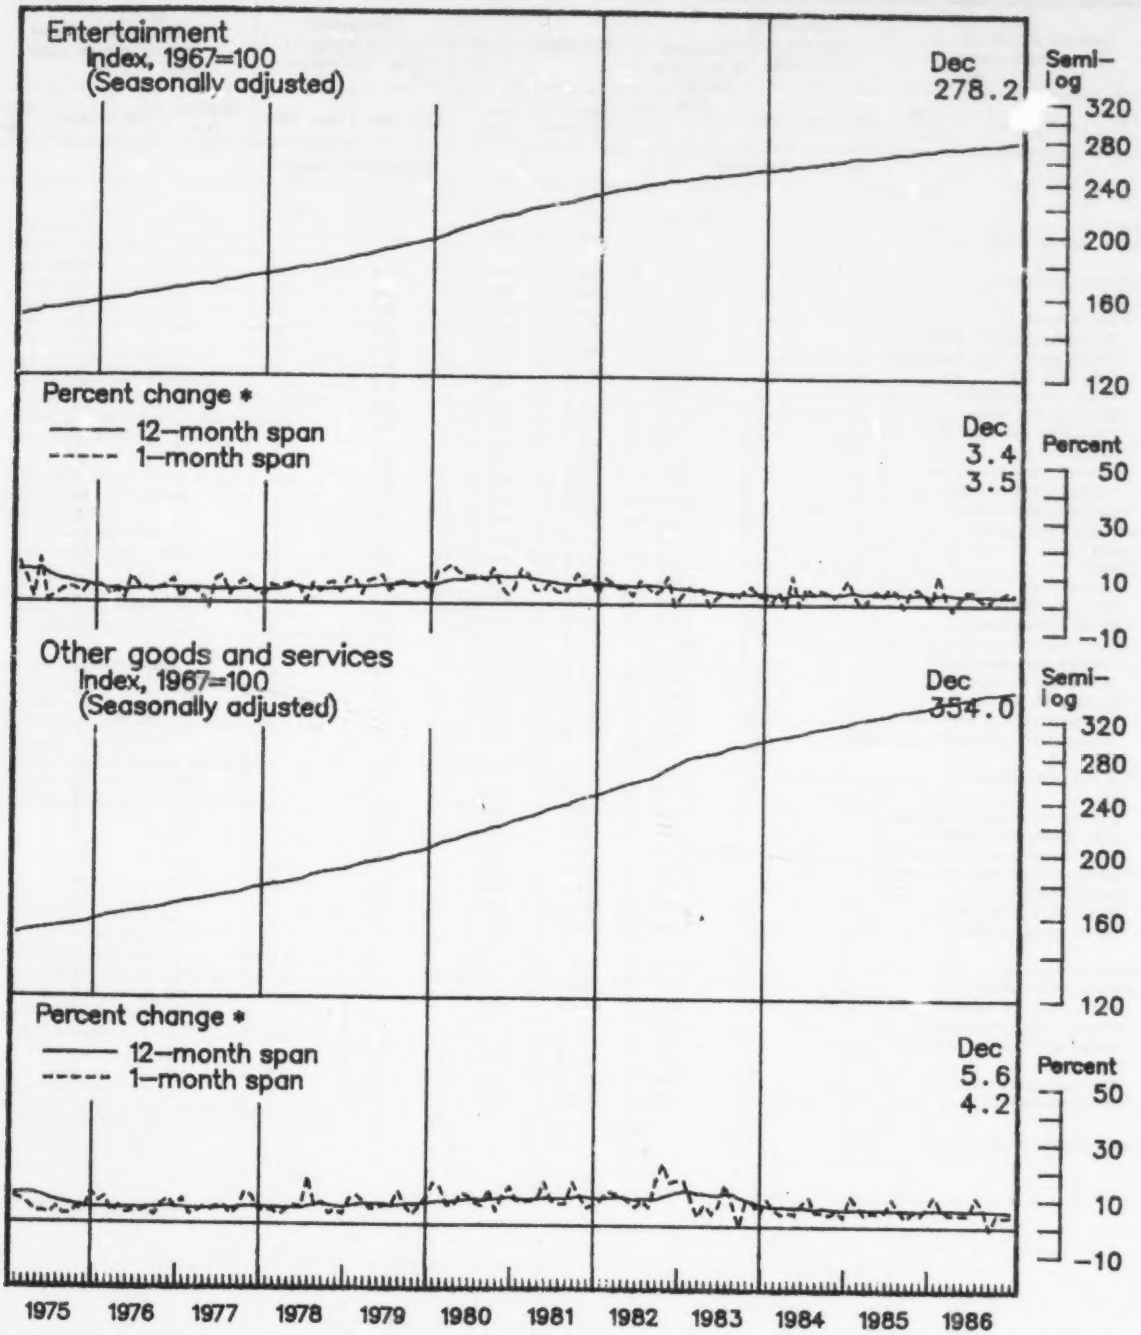
* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Chart 3: CPI-U: Transportation and medical care, 1975–86



* Percent changes over 12–month spans are calculated from unadjusted data. Percent changes over 1–month spans are annual rates calculated from seasonally adjusted data.

Chart 4: CPI-U: Entertainment, other goods and services, 1975–86



* Percent changes over 12-month spans are calculated from unadjusted data. Percent changes over 1-month spans are annual rates calculated from seasonally adjusted data.

Imported food and fishery products [4]	12/77	152.7	151.6	5.2	-.7	.5	.1	-.3

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 4. Consumer Price Index for All Urban Consumers: Food expenditure categories, seasonally adjusted, U.S. city average —Continued

(1967=100, unless otherwise noted)

Group and item	Other index base	Seasonally adjusted indexes		Seasonally adjusted annual rate percent change for—					
				3 months ending in—				6 months ending in—	
		Nov. 1986	Dec. 1986	Mar. 1986	June 1986	Sept. 1986	Dec. 1986	June 1986	Dec. 1986
Food away from home		366.2	367.8	2.7	5.4	4.4	4.6	4.1	4.5
Lunch	12/77	176.7	177.1	2.8	4.7	3.3	5.1	3.8	4.2
Dinner	12/77	176.1	177.0	2.4	3.8	3.7	5.1	3.1	4.4
Other meals and snacks	12/77	182.2	182.9	3.0	8.7	6.0	4.3	5.9	5.1
Alcoholic beverages		241.0	242.0	1.7	2.2	1.3	2.7	1.9	2.0
Alcoholic beverages at home	12/77	152.7	153.2	.8	1.3	.3	2.7	1.1	1.7
Beer and ale		242.5	243.1	-.2	1.5	2.2	3.4	.7	2.8
Wine [1]		239.4	240.1	11.2	.8	-.8	-1.8	5.9	-1.3
Distilled spirits [1,2]	12/77	142.0	141.9	1.7	1.1	.0	.0	1.4	.0
Other alcoholic beverages [1,3]	12/77	139.7	139.5	5.3	.9	-1.1	.8	3.1	-.3
Whiskey [1,3]		170.3	170.3	.2	.9	.5	.0	.6	.2
Alcoholic beverages away from home	12/77	176.9	177.6	4.8	5.7	2.5	2.3	5.2	2.4
Special indexes:									
Domestically produced farm food		297.2	296.6	-7.6	3.9	14.8	3.2	-2.0	8.8
Selected beef cuts [1]		276.6	278.0	-9.6	-9.1	12.0	9.6	-9.4	10.8
Imported food and fishery products [4]	12/77	153.6	153.1	21.3	-1.6	1.6	.8	9.3	1.2

[1] Not seasonally adjusted.

[2] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

[3] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[4] This index series will not be published after December 1986.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] New aggregate index. Monthly data for this series back to January 1967 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 5. Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average

(1967=100, unless otherwise noted)

Group and item	Other index base	Unadjusted indexes		Unadjusted percent change to Dec. 1986 from—		Seasonally adjusted percent change from—		
		Nov. 1986	Dec. 1986	Dec. 1985	Nov. 1986	Sept. to Oct.	Oct. to Nov.	Nov. to Dec.
Housing		361.7	362.1	1.8	0.1	0.0	-0.1	0.3
Shelter		410.2	410.4	4.6	.0	.4	.2	.2

Housekeeping and home maintenance services [1]		394.0	394.8	1.8	.2	.2	-.1	.2

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

[1] Not seasonally adjusted.

[2] This index series will not be published after December 1986.

[3] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[4] After December 1986, this index series, as a result of changes in the CPI classification structure effective in January 1987, will be published only as a special sub-strata index based upon a substantially smaller sample.

[5] New aggregate index. Monthly data for this series back to January 1978 are available from the Bureau of Labor Statistics.

NOTE: Index applies to a month as a whole, not to any specific date.

West/D [5]	2	12/77	-	175.3	-	176.3	.1	.6	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.
After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D [4]	.8	-.3	1.3	1.3	1.2	.3

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

All items less medical care	320.6	-1.0	318.3	.2	337.2	.4	325.5	.3	338.4	-1.4
All items less energy [11]	165.3	-.2	181.0	-.1	179.4	.8	176.6	.4	185.7	-.7
Energy [7]	149.8	-7.2	151.7	3.8	146.7	-2.6	166.5	-.4	161.0	-6.4
Commodities less food	268.6	-.4	269.0	-.5	260.0	-.2	255.2	-.4	257.1	-1.5
Nondurables less food	265.4	-.1	260.5	-.6	257.9	-1.1	242.7	-.6	244.3	-2.0
Nondurables	306.2	.4	287.9	-.2	293.8	.4	276.0	.5	283.3	-1.2
Services less rent of shelter [5]	111.2	-2.1	116.4	1.1	117.6	-.1	118.0	.4	120.1	-1.3
Services less medical care	371.3	-2.3	372.7	.9	434.0	.3	416.3	.4	426.3	-1.6

[1] Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1982=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[9] Indexes on a January 1976=100 base.

[10] Indexes on an August 1981=100 base.

[11] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[12] After December 1986, this index series will be published on a monthly basis.

[13] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

West/D [5]	2	12/77	-	176.7	-	177.6	-.1	.5	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[4] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[5] This index will no longer be published after December 1986.

[6] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[7] After December 1986, this index series will be published on a monthly basis.

[8] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.
After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[9] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

Table 19. Consumer Price Index for Urban Wage Earners and Clerical Workers : Selected areas, food at home expenditure categories

(1967=100, unless otherwise noted)

Area, region, and population size class	Other index base	Total food at home	Cereals and bakery products	Meats, poultry, fish, and eggs [1]	Dairy products	Fruits and vegetables	Other foods at home [1]

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. A local index will be published on a semi-annual average basis.

[4] This index will no longer be published after December 1986.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[6] A-1 and A-2 will be aggregated to produce a population size class A index after December 1986. A-1 and A-2 will no longer be published separately after December 1986.

[1] Detroit, Mich. will no longer be published on a monthly basis after December 1986. Beginning after December 1986, a local index will be published for even numbered months only.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base in L.A.-Long Beach, Anaheim, Calif.

[4] Indexes on a June 1978=100 base, except U.S. city average.

[5] Indexes on a June 1978=100 base.

[6] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[7] Indexes on a January 1976=100 base.

[8] Indexes on an August 1981=100 base.

[9] Indexes on a December 1977=100 base, except U.S. city average.

[NA] Data not adequate for publication.

Services less rent of shelter [5]	103.4	-2.2	105.9	1.0	105.6	-.2	104.5	.6	108.4	-1.5
Services less medical care	362.8	-2.4	357.2	.9	435.2	.3	381.9	.4	416.1	-1.7

[1] Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

[2] Due to smaller sample sizes in this area, data will no longer be published on a bi-monthly basis after December 1986. Local indexes will be published on a semi-annual average basis.

[3] After December 1986, Cleveland, Ohio will be published in odd instead of even numbered months.

[4] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[5] Indexes on a December 1984=100 base.

[6] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[7] Indexes on a June 1978=100 base.

[8] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[9] Indexes on a January 1976=100 base.

[10] Indexes on an August 1981=100 base.

[11] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo -Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[12] After December 1986, this index series will be published on a monthly basis.

[13] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

Services less energy	201.9	6.3	.7	205.6	4.5	.4	201.8	4.7	.6	204.9	4.9	.0

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1982 = 100 base.

[3] Indexes on a June 1978 = 100 base.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] Indexes on an August 1981 = 100 base.

[6] This index series will not be published after December 1986.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[7] This index series will not be published after December 1986.

Services less rent of shelter [3]	122.9	5.2	-1.3	119.5	3.6	-1.2	123.4	5.9	-.2	119.4	5.3	2.1
Services less medical care	212.5	4.9	-1.4	200.2	2.2	-.4	183.0	5.7	-.2	199.9	2.9	1.3

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1982 = 100 base.

[4] Indexes on a June 1978 = 100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981 = 100 base.

NA Data not adequate for publication.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base.

[4] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[5] Indexes on an August 1981=100 base.

[6] This index series will not be published after December 1986.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1981=100 base.

[7] This index series will not be published after December 1986.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2. After December 1986, indexes for the regions, size classes, and region/size class cross-classes will be published on a monthly basis.

[2] Data for this area will no longer be published after December 1986.

[3] Indexes on a December 1984=100 base.

[4] Indexes on a June 1978=100 base.

[5] Index coverage will be redefined effective January 1987. The current definition will not be published after December 1986.

[6] Indexes on an August 1961=100 base.

[NA] Data not adequate for publication.

Table P-1. Average residential prices for utility (piped) gas, electricity, and fuel oil, U.S. city average and selected areas

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Due to smaller sample sizes in this area, data will no longer be published after December 1986.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P-2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for Dec. 1986		Average price per KWH of electricity		Range of KWH consumption for Dec. 1986

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7–13.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will

not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washinton Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

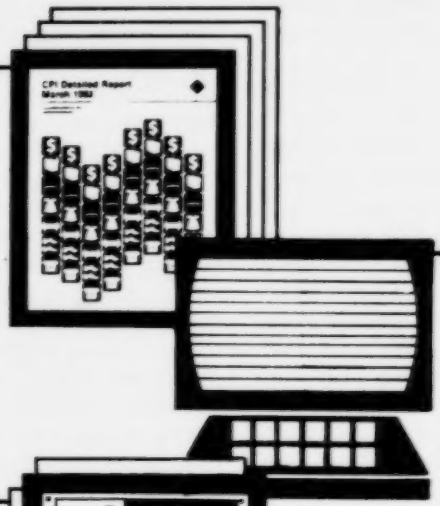
The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

U.S. GOVERNMENT PRINTING OFFICE:1987-181-498/60203

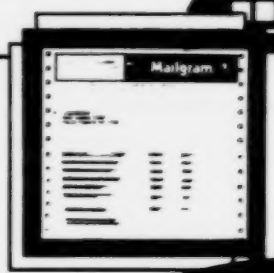
Where To Find CPI Information

Monthly Periodical:
Most comprehensive report available. Order CPI Detailed Report, $16 a year, $6 a single copy, from Superintendent of Documents, U.S. Government Printing-Office, Washington, D.C. 20402. Includes text, statistical tables, and technical notes.



Electronic News Release:
Quickest. Accessible electronically immediately at release time through BLS news release service. Write the Office of Publications, Bureau of Labor Statistics, Washington, D.C. 20212, or call (202) 523-1913.

Mailgram:
Overnight. Through the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Va. 22151. $145 in contiguous United States. Provides selected U.S. City Average CPI data.



Telephone:
Summary data on 24-hour recorded message. Key CPI numbers plus upcoming release date. Call (202) 523-1239.

Machine-Readable Form:
For users who need current and historical CPI data in machine-readable form, a single magnetic tape is $65. Data diskettes offer CPI-U and CPI-W indexes for all items and 104 detailed items for the U.S. City averages; 54 detailed items for selected local areas—for all released months of the current year plus the previous year. Single copy, $35; 12-month subscription, $288. For information, write the Office of Publications, Bureau of Labor Statistics, Washington, D.C. 20212, or call (202) 523-1090.

Monthly Labor Review:
Selected CPI data included in monthly summary of BLS data and in analytical articles. $16 year, $4.75 single copy. Available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
